

RIVERTON'S NEW \$86,800 SCHOOL BUILDING

Which will be open for public inspection at 7.00 p.m. next Tuesday. Appropriate dedication exercises will follow in the new auditorium at 8.00 o'clock. The dedication marks the culmination of a community enterprise started a little over two years ago.

NEW SCHOOL BUILDING TO BE DEDICATED NEXT TUESDAY NIGHT

Project Started Two Years Ago
to End With Exercises
in Auditorium

DR. J. D. MAHONEY
PRINCIPAL SPEAKER

Head of the West Philadelphia
High School English Dept.
Noted Lecturer

The Board of Education, at a dedication ceremony to be held in the auditorium of the school on Tuesday, February fourth, will formally accept from the contractors, on behalf of the borough, the recently completed improved and enlarged school building.

Although the entire building has been in use for the past month, and the January meeting of the P.T.A. was held in the auditorium, a number of minor points have had to be straightened out before the board could take formal possession. Happily, all these things have been ironed out, and on Tuesday the residents of Riverton will have an opportunity to examine their new school—a school that in point of accommodations, convenience, comfort and, above all, safety, is entitled to a place in the first rank of school buildings in the state.

The school building is to be thrown open to public inspection at seven o'clock on Tuesday evening. This will give the townspeople an opportunity to see what has been accomplished in the renovation of the old building; the fireproofing of the stairways; the elimination of the old, inadequate auditorium; the enlargement and modernization of the domestic science and manual training rooms; the comfortable and well-equipped library; and so on. The new classrooms on the Fifth street front of the building, and the auditorium, will also be open for inspection at the same time.

At eight o'clock the dedication service will be held in the auditorium. The Board of Education-Town Meeting joint committee has been fortunate to secure, as the speaker of the evening, Dr. John Dennis Mahoney, head of the English Department at West Philadelphia High School. Dr. Mahoney, who has been a lecturer on the staff of the Philadelphia Forum since 1923, is one of the most popular speakers in this part of the country and is justly famed for his skillful mixing of wisdom and wit in his addresses.

The Maple Shade Grammar School orchestra will provide music for the occasion, and Rivertonians who have not heard this organization will be agreeably surprised at the ability of this group of talented youngsters.

Col. Cornelius R. Vermeule, Jr., Federal Emergency Administrator of Public Works for the state of New Jersey, is expected to attend, and will be given a minute or so in which to tell something of the operation of his office in connection with PWA projects such as the Riverton school.

Riverton Town Meeting will be officially represented by Dr. Harry Rogers, president of Town Meeting at the time the school project was started, and indefatigable worker in its cause, and by Edwin Parry, present president.

An urgent invitation to attend the dedication is extended to all residents of Riverton. After all, it is their building, it is their money that has been spent on these improvements, and they should welcome the opportunity of seeing what has been done.

TRIED SUICIDE IN CINNAMINSON

Charles Myers Drinks Acid to "End
It 'All' But Poison Has
No Ill Effect

Charles Myers, of Parry, attempted suicide Wednesday morning by drinking acid.

Myers went into the Parry woods to gather fire wood and claimed that he drank the death potion while there. Mrs. Myers, who went to the woods later, found him staggering aimlessly about and put him on the sled to bring him home.

Dr. Bauer, of Palmyra, was called in and said that the man should be taken to the hospital. Officer Rodgers, of Palmyra accompanied the ambulance to the Myers home and notified Officer Dorworth of the affair.

Myers was taken to the Zurbrugg Memorial Hospital, where, after a thorough examination and the use of the stomach pump, he was sent home.

CHRISTIAN SCIENCE CHURCH BROADCAST

The Columbia Church of the Air program under the auspices of the Christian Science Church will be broadcast from Chicago on Sunday, February 9, 1936, by Hamilton Coleman, Christian Science Practitioner, at 1.00 p.m., eastern standard time, over a nationwide network of the Columbia Broadcasting System, and may be heard in New Jersey over stations WABC and WPG.

It is a noteworthy fact that the more enthusiastic a man is about the "share-the-wealth" idea the less he has of his own to divide up.

ARCHITECT

BYRON H. EDWARDS

Designer of many school houses throughout New Jersey, who was employed by the Riverton Board of Education as architect on the new school building.

HAND MANGLED IN CONVEYOR COG

Joseph L. Stack Seriously Hurt
While Oiling Motor
at J. S. Collins

Joseph L. Stack, coal and ice dealer, of Palmyra, was seriously injured at the J. S. Collins coal yard Tuesday afternoon at about quarter after four, when his left hand was crushed in the cogs of a coal conveyor.

Mr. Stack was talking to Frank Hamlin and "Ed" Yerkes while he was waiting for his truck to be loaded. He noticed that the silos were not working and was told that the motor had jammed. Earle Harder, the electrician, had been called and arrived just about that time. After fixing the motor he said that it was OK but needed oil. Mr. Stack volunteered to get some and accompanied Mr. Yerkes back into the store. He then went back into the silo and proceeded to oil the motor which was behind two large cog wheels. It is believed that his coat sleeve caught and carried his arm in between the cogs, badly mangling it. "Dick" Hamlin and Clayton Weikman saw "Joe" stumble out of the silo and went to his rescue. They immediately took him to Dr. Mills, who ordered him to the West Jersey hospital, Camden.

It was found necessary to amputate his left hand and part of the arm.

Riverton's New School

The people of Riverton, in providing improved facilities for its public school children, have done just what they have been doing ever since there was a Riverton—maintaining a high standard of education in the community.

The forces in Riverton that operated to secure this civic improvement were many. Full credit must be given to these factors, for without their cooperative effort the project could not have been carried through to a satisfactory conclusion without the strife and turmoil which so often attends public enterprises.

The Riverton Town Meeting, a group of loyal citizens whose efforts have resulted in many worthwhile civic improvements, comes in for a good share of the credit. The members of the board of education, almost without exception, have devoted hours upon hours of their time, and the interest and the support of the borough officials have been a great aid in the furtherance of the project.

Congressional representatives of Riverton aided in securing the Federal appropriation. The Public Works Administration officials in Newark and Washington were cooperative and helpful beyond the terms of their agreement.

In addition to these specific forces, many individuals have given a helping hand and have contributed much to the whole program of the improvement.

And last but not least, the will of the people themselves, who desire their children and other people's children to have every reasonable educational advantage, showed their spirit of cooperation when the public vote was taken.

The new building is equipped with a new and better heating and ventilating system. Better lighting equipment is installed in each room. Adequate means of safe escape in the event of fire is provided.

The system is now a unit. Part of the school is no longer housed in temporary quarters, and physical training classes will not be required to use a church basement several blocks removed from their classrooms. The whole institution, with all of its activities, are within its own walls and can thus be better supervised.

The construction of new lavatories, independently ventilated, and equipped with modern sanitary plumbing fixtures, is a desirable improvement.

The two special studies, manual training for the boys and domestic science for the girls, now have adequate facilities.

The auditorium and physical training room fills a long-felt need from both the school and community angle. For school purposes it is all that could be desired. Better stage facilities for school plays have been provided. Better seating accommodations and better visibility are features of the new construction. A motion picture booth and sound movie equipment are an innovation in the school's equipment, and marks a decided forward step in the visual education of the pupils.

By the addition of classroom space it was possible to assign a room for library purposes—a room well ventilated and well lighted. The stuffy, poorly-illuminated corridor will no longer serve as a library.

Thus for \$63,000.00 (and that's what it cost the taxpayer) the school children of Riverton have been provided with school facilities second to none, and which should serve to inspire them to greater effort with an increased measure of civic pride.

Riverton Public School

Reprinted from the Christmas Issue of The New Era, 1909

The early history of educational matters in Riverton are somewhat sketchy in obscurity owing to the fact that prior to 1865 no permanent records were kept by the school board. At a public meeting in that year it was decided that a book should be purchased in which the proceedings of all public meetings, trustee meetings and finances should be recorded.

As nearly as can be ascertained the first place in which school was held in this neighborhood was a little brick building which stood along the railroad opposite what is now Elm avenue. When the railroad was built in 1833 this building was moved, brick by brick to a nearby lot donated by Elias Morgan with the understanding that when it was no longer used for school purposes it should revert to the adjoining property owners. This school was conducted for the first time in 1833, attended the Friends School Westfield, which was conducted partly as a day school. Some pupils paid, while those who could not afford to do so were taught free.

The first schoolhouse, in what is now Riverton, but was at that time known as School District No. 1, Cinnaminson Township, was a frame building on the site of the present school, corner Fourth and Howard streets. This building was erected about 1865, at a cost of \$800. John Grant was the contractor, and Edward H. Pancoast worked for him as carpenter on the building.

At this time there were no County Superintendents, their place being taken by Township Superintendents. A little public building was available for school purposes, the sum of \$228.98 being apportioned by the Township Superintendents for the support of this school in 1865. Most of the money was contributed by interested citizens, and not raised by taxation. In 1867 the Township Superintendents in August of that year showed 125 children between the ages of five and eighteen years in the district.

At annual meeting held September 7, 1868 the following names of citizens were present and voted: Charles Mattis, Samuel C. Cook, W. H. Inskip, Henry Bower, John H. Seckel, George L. Senat, Thomas A. Buttern, Joseph L. Thomas, Henry C. Thomas, Dr. John Tanner, William M. Henry, Robert B. Knight, John A. Hendry, Edward Lippincott, William F. Cole, William S. Thomas, Robert Cole, Robert Biddle, William B. Pettrell, John Grant, Louis Cooper, David Pike, Charles Crosta, Rich and Hatfield, Isaac Lovett, Ira A. Dillon, Robert Roach, Morris Steele, George W. Davidson, William B. Ellison, John Bioren, Trill G. Schultz, Thomas Roberts, John Fraser, Rodman B. Ellison, Allen Robles, James Brown, Andrew Harrison, Robert Wells, Alfred Kimble, Daniel L. Miller, Ezra Lippincott and Leonard H. Davis.

In 1874 a cellar was put under the building, a heater installed and the first well dug. In 1889 a new one-story building was built by Edward H. Pancoast, contractor, at a cost of \$549. The present large building, known as Building No. 1, was erected in 1892, Grant & Lowden contractors, at a cost of \$4,400, and \$500 for heating plant. The dry closet system installed at a cost of \$175, was paid for by individual contributions of citizens. In 1896 Building No. 2 was purchased from the Catholic Church at a cost of \$1,000, and a kindergarten was opened there the following year, the building having been enlarged and made to meet the requirements of kindergarten work by Contractor Louis F. Lowden, at a cost of \$2,282.65.

In 1897 there was an enrollment of 51 out of 125 children in the district. In 1909 the enrollment had risen to 305, with an average attendance of 232. The present plant being entirely inadequate to meet the requirements arising made up of it, the School Board has been authorized to erect a new building to contain eleven classrooms, to provide for four hundred pupils, with a large auditorium and manual training room in the basement, at a cost of about \$100,000. The lot, and the contract has been made. The building will be up-to-date in every particular, both as to architecture and equipment, and will provide a school plant of which Riverton will have no need to be ashamed.

HOFFMAN SPEAKER AT G.O.P. DINNER

Third Annual Dinner Meeting to Be Held at Trenton Next Monday Night

The Associated Republican Clubs of Burlington County have announced their third annual meeting and banquet at Trenton, Monday night, February 3, at the Marine Grill of the Hildebrecht Hotel.

Because this is one of the most important political years in the country's history, and by reason of the part which New Jersey is expected to play in the federal government from the New Deal spendthrifts and the Socialistic brain trust, it is especially desirable that this event be the largest attended of the many affairs which this representative organization of Republicans, without factional affiliations, has yet sponsored.

Governor Hoffman has promised to attend the dinner and address the visitors. There will be other well known speakers. Prosecutor Howard Eastwood, of Burlington, has accepted the Associated Club's invitation to be toastmaster. Before the dinner, which is scheduled to start promptly at 6 o'clock, there will be a reception, commencing at 5:30, providing an enjoyable social hour. The speaking will last from 7 to 7:30 o'clock.

The charge for dinner tickets is \$1.25. Immediately after the dinner those who want to see the Legislature in action will go to the State House, where seats will be reserved for Burlington county until 8 o'clock, in both the Senate and Assembly galleries.

There will be music throughout the reception and banquet and, after that dancing until 2 a.m. The entertainment committee comprises the following: Nelson G. Myers, Mount Holly, chairman; Elwood A. Ziegenfuss, Beverly; Fred Hennings, Riverside; William Berry, Mount Holly; Alma Evans, Riverton; Bessie Miller, Edgewater Park; Pauline Bartlett, Burlington; Minnie Huxford, Florence; Sarah G. Schultz, Thomas Roberts, John Fraser, Rodman B. Ellison, Allen Robles, James Brown, Andrew Harrison, Robert Wells, Alfred Kimble, Daniel L. Miller, Ezra Lippincott and Leonard H. Davis.

Tickets may be obtained from any of the above, so long as the supply lasts. Nelson G. Myers, well known soloist and song leader, will lead the group singing.

There will also be other entertainment and specialties.

At an election meeting of the Auxiliary of the Riverton Fire Company the following officers were elected for the year: President, Mrs. Nellie Perkins; vice president, Mrs. Reba Gray; secretary, Mrs. Pearl Egans; treasurer, Mrs. Thelma Pippitt; accountant, Mrs. Claire Carhart.

The auxiliary will give a card party, February 18, in the Riverton fire house. Refreshments. Admission 35 cents.

It might sound like treason, but so far as the World Court is concerned, we would rather lose a case in court than win one in the trenches.—Brunswick (Ga.) Pilot.

If an onion is cut in halves and placed in a room that has been newly painted it will absorb the color of paint in a few hours.

MRS. M. A. FUNK IS HONOR GUEST

Mrs. M. A. Funk was given a farewell party by Mr. Funk and their daughter, Gladys, January 22, at the Morgan TenEyck hotel on Mirror Lake Drive, St. Petersburg, Florida. This ended a series of farewell parties given in Mrs. Funk's honor previous to her sailing for a several month's trip to Honolulu.

Luncheon was served for 12 in the main dining room. The table was attractively decorated with narcissus and maidenhair fern. The guests played bridge in the afternoon, and tea was served at 5 o'clock.

Mrs. Funk will sail from Havana and will visit Panama City, Colon, Los Angeles and San Francisco before reaching the Hawaiian Islands. She will return by sea to New York City in the spring.

Guests were Mr. and Mrs. L. F. Hayward, Freeport, L. I.; Mr. and Mrs. E. H. Mohler, Lancaster, Pa.; Mr. and Mrs. Shattler, York, Pa.; Mr. and Mrs. Samuel S. Swartz, Landale, Pa.; Mr. and Mrs. Poppleton, Cape Cod, Mass.

Mr. and Mrs. Funk, who are residents of Riverton, have been winter visitors at St. Petersburg for the past eight years.

Snover Funeral Home

INCORPORATED
FRANK A. SNOVER and JOHN N. SWARTZ
PALMYRA, NEW JERSEY
Telephone, Riverton 830

The fact that a funeral home owns a full complement of modern equipment enables it to render its service with exacting detail and lowest possible cost.

The Snover Funeral Home is so equipped and stands ready to serve economically.

A lot of folks objected when President Jefferson paid \$18,000,000 for all the Louisiana Territory. It would cost the government that much now to take a true census of Philadelphia.

The old fashioned man who, as a boy, was contented on Christmas with a fifty cent stamp and a twenty-five cent machine-made necktie now has a son who isn't satisfied with a new automobile unless it has a radio in it.

Would you invest wisely? Put thoughts and actions out at interest which will build up for you a fortune of personal force.

PALMYRA PLANS IMPROVEMENTS

Three PWA Projects Will Enable Borough to Fix Streets, Trees and Parks

Palmyra has three PWA projects by which it hope to benefit in the near future.

The first is one for the newly organized playground. Curtis Flynn, chairman of the park committee, said that their plans are as follows: improvement of the tennis courts, complete the two Bocca courts, additional equipment in the children's playground, such as swings, basketball stands, shade trees and benches, the children's part of the park; two new soft ball diamonds, making a total of three, grade and improve Chestnut street and South Broad street in front of the tennis courts, plant shrubbery and flowers in various spots in the park and lay gravel walks.

They are also planning to build seats for the spectators at the ball games, with guards in front to protect them from any foul balls.

Chairman William Engle, of the highway committee, reported that slow curing oil will be used on approximately four miles of streets in Palmyra, and that the city will be able to take care of an additional two miles. Work on the streets, however, is being held up until a break in the weather.

Chairman George Luce, of the shade tree commission, stated that Palmyra hopes to be able to trim 2,000 of their 3,300 trees, remove and replace 125 old and unsafe ones and plant between 500 and 600 new ones in various places in the town.

The tree project of \$14,925 has been approved by Washington but is still in the hands of the officials in Newark.

PHALANX ELECTS NEW OFFICERS

Dr. Hayes Brady President, Robert Finney Secretary and Treasurer

On Monday evening, January 13, the Omega Chapter, Phalanx Fraternity met at the home of E. Newbold Cooper, mentor, to effect a reorganization.

The following officers were elected: Dr. Hayes Brady, president; Louise Heavner, vice president; Robert Finney, secretary and treasurer. The following committees were appointed: Publicity, W. Maynard Bowen; program, Cecil Guest; Young Men's Council, Louis Heavner.

Following the regular meeting Mr. Cooper read a story to the fellows that had been prepared by a research laboratory relative to motor oil. The facts contained in the article blasted some of the members ideas as to when and how often it is necessary to change oil in the crankcase of a motor car.

Upon invitation of Mr. Cooper, the meeting of January 27th was also held at his home.

At the close of the business session a very interesting and informative debate was held on the subject, "Resolved, that theocracy can survive in the United States."

The affirmative was taken by Louis Heavner, and Robert Finney presented the negative. The conclusion was reached that although the form might be changed so it is unrecognizable as democracy, we will always have what is known as a democratic form of government.

Following the debate, Robert Finney exhibited samples of some oils and gasoline he had prepared.

The next meeting will be held Monday, February 10th.

The Golden Hour Circle of Calvary Presbyterian Church held a covered dish luncheon in the ladies' parlor Wednesday afternoon. Circle A cleared nearly \$100 during their meeting, and more than Circle B and C are out to clear even more. They are making their money by having luncheons.

Mrs. Gorham P. Sargent is recuperating following an operation in the hospital at St. Elizabeth's Hospital, Riverside, recently.

Camp No. 3, P.O. of A., attended the installation of officers at the Merchantsville Camp last Thursday evening. Mrs. Eula Roach, of Palmyra, district president, was the installing officer.

Mrs. B. R. Stevens, of Palmyra, slipped on the ice in Philadelphia last week and broke her ankle in three places. She is home now after spending several days in the Hahnemann Hospital.

Alex. Murphy, who has been suffering with intestinal grip, is able to return to his work.

Mrs. Howard Elliott entertained the Wednesday afternoon Sewing Circle at her home this week.

Mrs. Charles DeGrau, of Riverside, is spending several days with her daughter, Mrs. Robert Hullings, of Camden.

The Fork Landing Yacht Beneficial Association held a card party in their club rooms Wednesday evening of this week. Many prizes were awarded and refreshments served to members and their friends.

Mrs. Thomas Trout, of Rye, N.Y., spent the weekend with her nieces, Mrs. W. L. Caskey and Mrs. Ross Evans.

Mr. and Mrs. Charles Trout, of Philadelphia, spent Sunday at the home of Mr. and Mrs. Ross Evans.

Mrs. Claude Barto entertained the Philadelpha Class at luncheon in Tuesday.

Mrs. J. L. Harris and daughter Marian left Riverton Thursday to spend the rest of the winter at Mt. Airy, Pa., with Mrs. Harris' sister.

Miss Helen Harris, of Riverton, is recuperating after a recent operation, at the home of her sister in Brookline, Pa.

Mr. and Mrs. Thomas McChesney and daughter, Mary Elizabeth, of Moorestown, spent the weekend at the home of Mr. and Mrs. Harry Sim.

Miss Dorothy Hartford, of Camden, was the guest of Mr. and Mrs. Howard Elliott, of Elm avenue, over the weekend.

Howard Yerkes, of Linden avenue, was entertained by the guests of the friends in honor of his birthday Saturday evening. The guests were the Misses Katherine Broderson, Virginia Schwager, Dorothy Hartford, Grace Billard, Ruth Horner, Ruth Alberson, Mary Wells and William Cooper, Howard Elliott, Lawrence Schwager, Nelson Ross, Carl Weber and Frank Prox.

The Literature Department of the Woman's Club of Palmyra and Riverton met at the home of Mrs. Clarence Yerkes, of Linden avenue, Monday afternoon.

Mr. and Mrs. A. M. Bowker, and Mrs. Fannie Reeves, of Elm avenue, were guests of Mr. and Mrs. L. C. Bowker, of Abascon, Sunday.

CALVARY PRESBYTERIAN CHURCH

Rev. C. T. Bates, B.D., Pastor

The Sacrament of the Lord's Supper will be observed on Wednesday evening, February 2nd, at eleven o'clock. All who have made a profession of their faith in Jesus Christ as Saviour and Lord are cordially invited to this church. The church school will meet at 9:45 a.m. Junior Christian Endeavor Society at 4 p.m. and the Senior Christian Endeavor Society at 7 p.m. An interesting musical program has been arranged for the Senior Christian Endeavor meeting and all young people will be welcome.

The Midweek Service will be held on Wednesday evening, February 5th, at 8 o'clock.

The Ladies Aid Society will hold its monthly meeting on Wednesday afternoon, February 5th, at 2:30 o'clock and will be followed, at 3 o'clock by the meeting of the Women's Missionary Society. This will be the annual meeting for the election of officers for the Missionary Society. All ladies of the congregation are most cordially invited to attend both meetings.

To all those in the community who have no regular church home here in Calvary church would invite to enter into its worship and fellowship.

CENTRAL BAPTIST CHURCH

Rev. George Lockett, B.D., Pastor

Services Sunday, February 2, 10:00 a.m., Bible School. Superintendent William Cooper gave the school his impressions of Kagawa. He had the privilege of hearing in Philadelphia last week. He brought to his listeners the high lights of the world's renowned evangelist.

11:15 a.m., Morning worship. Denominational Day will be observed. This service, Pastor Lockett will deliver a sermon on "Our Heritage."

7:45 p.m., Evening worship. The High School Young People's Group will attend this service in a body, in a body, in observance of Loyalty Day. The sermon subject will be "Loyalty to the Church."

PALMYRA MORAVIAN CHURCH

Albert J. Harker, B.D., Pastor

Services next Sunday, February 2, 9:30 a.m., Morning service. Pastor's sermon theme: "The Seed—The Word of God."

6:45 p.m., Christian Endeavor meeting. We are glad for the increased interest and extend a welcome to all young people on behalf of the society.

7:30 p.m., Evening service of song, prayer and praise. Sermon: "Contrasts—Believers vs. Professors."

The Confirmation Class will meet for organization next Saturday February 1, at 2:00 p.m. in the pastor's room.

The order for a Hammond Electric Organ for our church has been

INCREASE BOARD AT SANATORIUM

Freeholders Add Two New Members to Board of Managers

The membership of the Board of Managers of Fairview Sanatorium was increased from five to seven members through the adoption of a resolution offered by Freeholder Frank Cook at a recessed meeting of the Board of Freeholders on Saturday afternoon. The resolution was passed by a 4-0 vote. Freeholder Charles R. Stout not casting any vote.

This increase, which places the New Dealers in control of the institution's management, was, it was pointed out during the meeting, provided for by state law.

Immediately after approving the increase, the board appointed Howard Clifford J. Whiteley, of Yardville, 560 feet of 30-inch corrugated iron pipe, \$2,128.

R. B. Dayton, of Trenton, same unit, \$2,066.40. United States Cast Iron Pipe and Foundry Company, of Burlington, 204 feet of 12-inch cast iron pipe, \$150.96; 400 feet of 21-inch cast iron pipe, \$759.50; 469 feet of 24-inch cast iron pipe, \$1,041.18; 560 feet of 30-inch corrugated iron pipe, \$1,831.20.

These bids were referred to Mr. Jones, and at the afternoon meeting he recommended that all be rejected. The clerk will advertise for new bids.

The board took the first steps toward making application to the Federal Works Administration for removal of the Public Service tolling tracks on High street, Burlington. The board also took steps to make before the board will take any definite action in this matter, it will require that Burlington Common Council relinquish its rights to any money that may be paid under the agreement made with the Public Service.

BUDGET HEARING

The advertised public hearing on the proposed 1936 budget for the town of Cinnaminson was held on Friday afternoon, with Director Adams presiding. After Clerk Price had read the budget for 1936 and 1935, Mr. Adams called for any objections that might be forthcoming. No one among the twenty-odd persons in the audience had anything to say.

The members of the board reconvened at the regular meeting place and at 3:30 on resolution of Mr. Adams, formally adopted the budget, which is anticipated to be a reduction of 18 cents in the county tax rate for the current year.

Salaries Are Fixed

Under another resolution by Mr. Adams, the treasurer was instructed to pay the salaries of county employees for 1936 as established by the board.

Mr. Stout moved that the Board of Taxation be permitted to pay its two extra clerks at the rate of \$5.00 a day, instead of \$4.50 as previously set. He said the board felt the county could be saved from its budget, and that the clerks should be given the added funds in view of the fact that other county employees are having pay cuts restored. The motion was carried.

Permission was given to the New Jersey Bell Telephone Company to install 32 feet of underground conduit on Branch street, Mount Holly. Action of the freeholders was necessary as this is a county road.

William J. Smith, of Bridgeboro, was re-appointed county fire marshal for a term of one year, his salary being \$500 plus an allowance of \$200 for expenses.

On motion of Mr. Jones, the board placed itself on record as being opposed to Assembly Bills 33 and 34, designed for diversion of state highway funds, on the ground that such diversion would greatly increase the tax rate. An expression of the board's feeling in the matter was ordered sent to Senator Powell and Assemblyman Newcomb.

Pipe Bids Rejected

During a very short session on Friday morning, the board received bids for furnishing pipe for the storm sewer at Springdale, Burlington.

GRADUATING CLASS OF 1903

Standing—Robert Steedle, Mary Major, Walter Wright.
Seated—Dorothy Mattis, Florence Tricker, Alice Grenelle.

ton. The bidders and their prices were as follows:
Clifford J. Whiteley, of Yardville, 560 feet of 30-inch corrugated iron pipe, \$2,128.

R. B. Dayton, of Trenton, same unit, \$2,066.40. United States Cast Iron Pipe and Foundry Company, of Burlington, 204 feet of 12-inch cast iron pipe, \$150.96; 400 feet of 21-inch cast iron pipe, \$759.50; 469 feet of 24-inch cast iron pipe, \$1,041.18; 560 feet of 30-inch corrugated iron pipe, \$1,831.20.

These bids were referred to Mr. Jones, and at the afternoon meeting he recommended that all be rejected. The clerk will advertise for new bids.

Refunding Plan Approved
Walter R. Darby, writing on behalf of the State Funding Commission, reported that the county's plan for refunding its debt had been given final approval. Because this came late, it was necessary to change from January 23 to 30 the time for receiving bids for the sale of bonds, including \$58,000 general refunding bonds, \$114,015 road and bridge bonds. It also meant postponing the January 27 to February 6 the date for calling in various improvement notes.

The County Welfare Board notified the freeholders that in its budget it included \$1,200 for two automobiles. It asked that they be new 1936 cars, properly licensed. Direct or Adams was authorized to proceed in the purchase of a new car. A letter from Miss Rebekah B.

Wills, written on behalf of the Board of Managers of the Burlington County Hospital, thanked the freeholders for that institution's increased appropriation.

A communication from Warren S. Painter, president of Beverly Council, asked that the county take over the work of lighting St. Michael Drive. Mr. Jones said that, in view of the heavy road program for the year, he did not feel it would be wise for the county to tackle this work. The matter was referred to him for settlement.

Similar requests from Moorestown and Riverside townships were given the same disposition.

D. P. Hopkins, of Beverly, wrote to the freeholders, expressing his congratulations on their fine work with the county budget.

Fire Marshal's Report
The annual report of Fire Marshal Smith was received and filed. It reported a detailed account of the various investigations he made during the year.

He reports 467 general alarms, 199 silent and 14 fatal, making a total of 666.

Most of these fires were in frame houses, of which 229 were burned, while there were also 154 grass fires.

Five persons died as a result of burns.

Of the total, 146 fires were from unknown causes, 114 were caused by defective chimneys. Fifty of the fires were caused by carelessness.

The value of buildings was \$423,000. (Continued on page 13)

TOWNSHIP OF CINNAMINSON BUDGET—1936

NOTICE

Notice is hereby given that the following local budget and tax ordinance was approved by the Committee of the Township of Cinnaminson, County of Burlington, on January 14, 1936.

And that the budget and tax ordinance will be held at residence of George C. Frank, on Thursday, February 13, 1936, at 2:00 o'clock p.m., at which time and place any and all persons desiring to be heard in opposition to the budget and tax ordinance of the Township of Cinnaminson, for the year 1936, may be presented by any taxpayer of said Township.

LOCAL BUDGET OF TOWNSHIP OF CINNAMINSON

COUNTY OF BURLINGTON

FOR THE FISCAL YEAR 1936

This Budget shall constitute the Tax Ordinance.

An ordinance relating to taxes for the year 1936.

BE IT ORDAINED, by the Township Committee of the Township of Cinnaminson, County of Burlington, that there shall be assessed, raised by taxation, and collected for the year 1936, the following items:

LAY CORNERSTONE OF NEW SCHOOL

School Children and Faculty Combined in Ceremony on Tuesday, Oct. 1, 1935

The faculty and the students of the Riverton Public School met at the school Tuesday, October 1st, at 2 o'clock in the afternoon to participate in the ceremony of placing the cornerstone in the new building.

The large cast-iron block bearing the figures 1935 contained a copper box in which were placed such papers as related to the new building project. Some of the papers placed within the stone are: a list of the faculty, a list of the board of education members, a list of the Town Meeting committee, several issues of The New Era containing stories about the new building project, the program of the 1935 graduating class, the aims and objectives of the Riverton Public School, and the autograph of the architect.

The school children met their teachers in the school lot at the corner of Fourth and Howard streets at 1:45 p.m., each bearing an American flag.

Mrs. Marion R. Elwell, president of the Board of Education, placed the papers in the cornerstone, after which Miss Caroline M. Staman, principal, applied the mortar, sealing the stone in its place.

"America" was sung by the assembly.

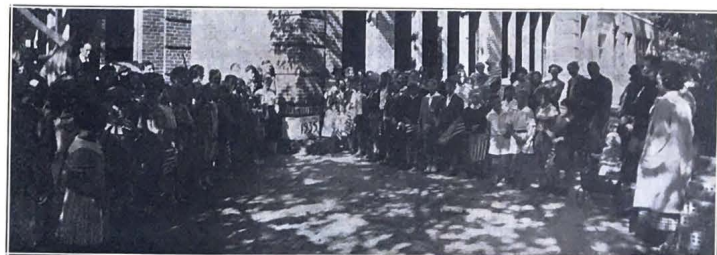

The stone is located at the left hand corner of the new classroom section adjoining the auditorium.

One Democratic statesman insists that a law ought to be passed providing that no corporation be illegal to publish returns of straw votes unless they favor the Deal?

How many weary journeys have had to be undertaken for want of a bridge between knowledge and understanding?—Hugh Redwood.

Nearly half of London's 520,000 clerks are women.

EXERCISES AT CORNER STONE LAYING AT RIVERTON PUBLIC SCHOOL

FACULTY, STUDENTS AND PARENTS

who gathered at the southwest corner of the new school building at two o'clock, Tuesday afternoon, October 1, 1935, when short exercises were held and the cornerstone placed in position. Miss Caroline M. Staman, principal, addressed the students briefly explaining to them how the cornerstone symbolized the foundation to a good education, and then read to them a list of contents to be placed within the stone. Mrs. Marion R. Elwell, president of the Board of Education, placed the papers within the stone and Miss Staman applied the mortar sealing the lid. Following these exercises "America" was sung by the group, bringing the exercises to a conclusion.

TIPS ON GROWING

BY ONE WHO GREW UP IN THE BUSINESS

"Cabbages are beautiful" insists Selma in "So Big," to the hilarious amusement of Jan the farmer. Economic value of a plant often dwarfs or obscures its beauty. The lowly Chive for instance bears heads of blue resembling the Sea Pink or Thrift (Armeria) and every whit as lovely, and it is a fine border plant for the vegetable garden. We have often plucked flowers of it and as a joke asked some well-informed gardener friend to name it and nearly always the name of a dizenizen of the hardy flower border it has earned. Professor Work, of Cornell University, says: "Gardeners often

grow Chives, putting little clumps into pots or berry baskets and selling them to housewives who pick off the little leaves to flavor soups and shingings. A clump growing in the garden is beautifully green all summer and when it becomes a mass of purple bloom in early summer, it is a match for any of our garden flowers.

A promising enterprise for one's declining years would be making a little ornamental vegetable garden. A corner could be made quite interesting at least, applying landscape principles in the use of Girasole (Jerusalem Artichoke), a few stalks of Corn, Peppers and Tomatoes for color. Delicate Squash trained on trellis, Parsley for border and Kale for frills, Scarlet Runner Beans, and so on. There are also ornamental forms of some of our plain vegetable, such as Kale Chard, that make a fine border. Shake off the snow before it freezes the branches. One of the nurs-

The Ginkgo biloba (Maiden Hair Tree), with its Adamant-like leaves, is probably the most ancient and venerable tree in existence. It is an only child. It does not have a single near or remote relative in the whole world, although remains of its leaves are found throughout the world.

The berries of the Holly and Mistletoe are said to be poisonous when eaten.

The potato beetle is said to be completely checked in Britain but is spreading on the Continent, especially in France. When it made its appearance in Germany years ago the military troops very shortly got rid of the pest by hand picking.

Evergreens, Boxwoods, etc., liable to be damaged by heavy snowfall, should be shaken together.

Some walk up these twelve flights" he gasped. "Why didn't you ride the elevator?" asked the lawyer.

"I meant to, but I just missed the blame thing!" was the reply.

Japan has three medical colleges for women.

Some walk up these twelve flights" he gasped. "Why didn't you ride the elevator?" asked the lawyer.

TOWN MEETING FOSTERED SCHOOL

School Improvement Considered
First Need of Riverton in
Civic Meeting

Riverton's new \$60,000 school project, to be dedicated with exercises next Tuesday, February 4, first received public expression at a special meeting of Riverton Borough Council, Monday, November 20, 1935, held for the purpose of taking formal action on a riverbank improvement project.

The special council meeting was held for the purpose of obtaining public opinion upon a project to improve the riverbank drive with the aid of the federal government. Approximately 300 citizens turned out for this meeting, a majority of whom objected to an expenditure of \$60,000 for riverbank improvement.

While the councilmen were in executive session planning a course of action, the citizens assembled, made plans for the temporary organization of a civic association. Those appointed to temporarily head and organize the as yet unnamed civic group were as follows: A. B. Garwood, president; Karl W. Latch, secretary.

Wolcott Proposes School

During the meeting Everett O. Wolcott in speaking of the proposed riverbank project stated that improved school facilities with the use of federal aid would be a much more desirable and useful project.

He reviewed the school facilities that existed at that time. Some of the salient points in his talk were as follows: the present school building was built in 1910 and because of the need for additional space, a portable building, housing two classrooms, was erected in 1929 to provide temporary relief. Part of the old auditorium had been converted into a manual training room which did not provide ample space for that subject and restricted the use of the auditorium for assembly and physical

training purposes. The heating plant, while operating satisfactorily, was becoming a problem from the standpoint of maintenance due to its 25 years of hard service. In the old set-up the only library facilities available was the conversion of a dark hallway into a reading room. The fire hazard was a serious concern of the board of education. The necessity for renting space in the Calvary Presbyterian Church for physical training purposes was undesirable. He stated that the board had informally discussed the subject of school improvement with federal aid and would be glad to make a survey of the proposition if the people of Riverton so desired.

Dr. Harry L. Rogers placed the need for improved school facilities ahead of any other civic project, stating that Riverton should be assumed to continue with school facilities no better than offered at that time. He described the portable building as little better than the little red schoolhouse used by our forefathers.

River Bank Project Dropped
Council, coming from executive session, resumed the meeting and announced that it would withdraw its riverbank project, and endeavor to have the government funds allotted thereto applied to a project meeting the approval of a majority of Riverton citizens.

The meeting adjourned to await the call of the newly-organized civic group.

A "steering committee" headed by Francis B. Howell, and the following citizens: James S. Coale, Benjamin S. Meching, H. E. Moyer, Ross T. Elliott, William C. Crouch, Harry F. Jones, J. Wilson Sylvester, Alexander B. Garwood, Karl W. Latch, Hilton M. Smith, Everett O. Wolcott, Robert A. Marshall, John L. Stroblin, C. P. Mayfield, and Ross E. Martin, met and prepared a schedule of needed civic improvements; heading the list was the school project.

The civic group was again called into public meeting where the official name of Riverton Town Meeting was adopted. The officers elected for a term of one year were as follows: president, Dr. Harry L. Rogers;

vice president, Mrs. Gilbert A. Coe; secretary, Karl W. Latch; treasurer, Ross T. Elliott. The following fifteen citizens were elected to serve on the board of directors: Harry E. Moyer, Mathias Sontheimer, A. B. Garwood, Wayne C. Ayres, Herbert Evans, J. W. Sylvester, Ross E. Mattis, Harry F. Jones, Edgar W. Miller, Mrs. J. D. Clark, Benjamin S. Meching, Edwin S. Harry, C. P. Mayfield, Herbert M. Morris, and Mrs. E. K. Merrill.

Approves Bond Issue

This group passed a resolution favoring improved school facilities at an expenditure not exceeding \$75,000 providing federal aid could be secured to finance the project, and further providing at least 25% of the amount could be secured as an outright grant. The vote at this meeting on the resolution was 148 for to 4 against. The secretary was instructed to advise the board of education, then in session in the principal's office of the action taken at the Riverton Town Meeting.

The board of education received the resolution offered by Town Meeting and invited that civic group to appoint a committee of ten of its members to cooperate with the board in preparing plans for school improvement.

The committee appointed by the president was as follows: Howard S. Coe, chairman; C. S. Meers, Mrs. Alma Evans, Porter B. Caldwell, Mrs. Nora Holcomb, Edward Moorhouse, Mrs. T. J. Knudsen, Clarence Hubbs, Mrs. Laura Reiger and Albert Farrow.

The committee of ten from the Riverton Town Meeting met with the board of education December 7, when desirable features for school improvement were discussed.

Byron H. Edwards, Architect
Byron H. Edwards, of Camden, and Stanley P. Stewart, of Riverton, architects, agreed to work as a unit in preparing plans for the proposed improvements, and were to submit tentative plans at the next meeting of the board to be held December 18th, 1935.

The joint committees working on the project reported that to incorporate the most essential improve-

RIVERTON'S FIRST BRICK SCHOOL

Built in 1910 by Peter Tait, builder, at an approximate cost of \$40,000, and to which the alterations and addition have just been completed.

ments \$85,000 would be required. The officers of Riverton Town Meeting called another public meeting urging the citizens to be present and give that body a representative cross-section of public opinion on whether or not the board of education should incur the expense of preparing the project for a final and legal vote of the people.

At this meeting, December 27, 1935, over one hundred citizens braved the snow and bitter cold to hear the report of the joint committee, as well as the architects' description of the proposed project.

Approves \$85,000

Following a lengthy discussion of the project Francis B. Howell offered the following resolution which was seconded by Harry E. Moyer: "That the Riverton Town Meeting be placed on record as endorsing the plans submitted by the architects on behalf of the joint committee of the school board and Town Meeting calling for an expenditure of \$85,000, with 30% to be secured as an outright grant." An oral vote was

taken and no dissenting voice was raised. Word was transmitted from the Riverton Borough Council that they were 100% behind the Town Meeting and approved their course of action.

The Board of Education, upon receipt of the Town Meeting approval of an \$85,000 school project, forwarded its application to the Public Works Administration of the United States government.

State Approves Plans

A tentative approval of the proposed alterations and addition to the Riverton Public School was received by the board from the State Department of Public Instruction January 20, 1936.

In a letter dated April 9th, 1936, Congressman D. Lane Powers advised Dr. Harry L. Rogers, president of the Town Meeting, that the application of the Riverton Board of Education for federal funds for its school project, was being held for final approval pending additional appropriation of funds for the Public Works Administration.

(continued on page 7)

Town Meeting Fostered School

(continued from page 6)

A long period of watchful-waiting, in which hope for the new school project was almost abandoned, was brought to a close on November 9th, when a communication was received from Cornelius C. Vermeule, Jr., state engineer for the Public Works Administration, stating that Riverton's application (Docket No. 8211) for \$85,000 had been approved.

Building Committee Appointed

Following receipt of the letter of acceptance from the PWA authorities, the school board met in special session Thursday, November 15th, 1935. A second letter from the PWA was read at the meeting. The letter stated that \$60,000 of the project would be covered by a bond issue and 30% of all labor and materials would be made as an outright grant, but in any case not to exceed \$23,500. The letter further stated that a loan agreement was being prepared in Washington and that action by the board should be deferred until it was received.

The president of the board, Mrs. Marion R. Elwell, appointed a committee to be known as the building committee. As was follows: Hilton M. Smith, chairman; Everett O. Wolcott, Walter K. Woolman and Karl W. Latch.

Special Election

At a meeting held Monday night, December 3, 1935, the board of education set Friday evening, December 21st, as a special election date for a public vote on the \$60,000 bond issue.

The Riverton Town Meeting and members of the Riverton Board of Education cooperating prepared prospectus of the proposed school project. These were printed and distributed to every voter in the town prior to the special election.

A committee of fifty-two from the Riverton Town Meeting was organized for the purpose of distributing the prospectus and answering the questions of voters concerning the project.

In the biggest special school election ever held in the Borough of Riverton, 500 voters in snake-dance formation inched their way to the ballot boxes to vote on the eleven school project. The final count showed that out of the 498 ballots cast, 385 voted yes and 163 voted no; seven ballots were rejected due to improper marking.

Thus the new school project was endorsed by a majority of almost 4 to 1.

Mathews Solicitor

Frank A. Mathews, Jr., appointed by the board of education to represent it in legal matters pertaining to the new school, stated that all the requirements of the PWA had been met and that the next move would have to come from the government.

This report was made following the special election.

At the meeting held January 7th, 1936, Byron H. Edwards, Inc., was employed by the board as its architect for the project.

Plans and specifications submitted by Edwards were approved at a special meeting held February 27th.

Present at this meeting were Robert A. Marshall and H. L. Unland, appointed by Town Meeting to cooperate with the board throughout the duration of the project.

On March 4th the board of education authorized advertisements inviting bids on the project, the plans and specifications having received the approval of the PWA authorities.

Bids Too High

Bids were received at a meeting held in the school auditorium Friday, March 29. A contract was split into five sections as follows: general construction, structural, ornamental and electrical. The bids were ordered received and spread upon the table.

April 4th the board of education met and rejected all the bids, owing to the fact that the combined total of the low bids exceeded the \$85,000 allotment.

Bids were again advertised for including the essential alternate items, such as architect's fees, equipment, legal expenses, interest during construction, and miscellaneous items of expense totaling \$11,964. Thus the net necessary to proceed with the project in accordance with the plans exceeded the appropriation by approximately \$15,000.

BOARD MEMBERS MAKE INSPECTION ON NOVEMBER 11, 1935

Bottom row, left to right: C. W. Raycroft, resident engineer of the Public Works Administration; Raymond Rafferty, secretary-treasurer of the Rafferty-Kennedy Company, general contractors; Byron H. Edwards, architect; Frank MacDonald, inspector for Byron H. Edwards; Karl W. Latch, board member; Mrs. Marion R. Elwell, president of the Board of Education; Walter K. Woolman, vice president of the Board; William H. Bottger, district clerk. Top row, left to right: Frank A. Mathews, Jr., board's solicitor; John H. Werner, board member; Hilton M. Smith, chairman of building committee; Everett O. Wolcott, board member, and Grace M. Yost, board member.

ment, legal expenses, interest during construction, and miscellaneous items of expense totaling \$11,964. Thus the net necessary to proceed with the project in accordance with the plans exceeded the appropriation by approximately \$15,000.

Asks Additional Grant

The Riverton board of education unanimously passed a resolution requesting an additional grant of \$15,000 of the federal Public Works Administration.

Harry E. Moyer was authorized by the board to visit the PWA authorities in Washington, D. C., in an attempt to secure the additional \$15,000 grant. Upon his return he reported that it would be impossible to secure a grant in excess of the 70-30 ratio.

Following this information and a background of the failure of two at-

tempts to invite bids to meet the appropriation, the board of education authorized the architect to proceed to revise the plans and specifications to come within the authorized \$85,000.

Revised Specifications

The original features of construction contained in the revised plans are as follows: the tower in the front of the building to house the principal's office, teachers' rest room, boys' and girls' lavatories, as well as fireproofing the floors and walls on the two upper floors of the old building.

The second lot of bids were, therefore, rejected.

Revised plans were passed by the school board at a meeting held June 13th, and authority given for re-advertising. The date for completion was extended from October 5th to November 5th, 1935.

The third set of bids were received at a meeting on June 26th. These bids barely enabled the board to proceed with construction in accordance with the revised plans. Only by the board taking full advantage of the \$60,000 bond issue and the \$23,000 government grant, voted at the special election, would they have been able to proceed with the construction amounted to \$75,521.

Contracts Awarded

The successful contractors and their bids are as follows: general construction, awarded to the Rafferty-Kennedy Company, of Philadelphia, at a total of \$53,148; structural, ornamental and miscellaneous iron work, to the Camden Iron Service Company at a total cost of \$5,245; heating and ventilating, mechanical

What the Pupils Think of Their New School

I like the new building. The school grounds are pretty. The rooms are nice.

Roland Harris, First Grade.

I like the new school. I like the new windows. They are low and I can see out of them. I like the new hall.

Elmer Moreland, Second Grade.

Building Things

The carpenter built new rooms at school for the kindergarten and first grade and second grade too. We have a new auditorium too. The carpenter put holes in the wall for telephones.

Lloyd Major, Third Grade.

Our New School

Our school is the best of all. It has everything you can think of. We have a fine new basement. New fire proof halls and stairs.

The kindergarten has a large, light room. It has a fireplace which lights up. They have a set of tables and little chairs. They have new kind of place in which to hang their coats and hats. They have a sand box, too. The first grade has a magic blackboard. You pull handles and the blackboard opens. Inside is where they hang their coats and hats.

We have a new auditorium. It is very large. We are going to have a new sound machine. We have dressing rooms on either side of the stage.

Bebé Carhart, Fourth Grade.

Our New School

I like the new school because it has so many nice new things. One of them is the new telephone connection with the office. There is new lighting fixtures and a new heating system. We have new fountains in

the new school. It has new fire protection floors in the halls.

The school has a new auditorium with a movie booth. It has two new classrooms and a kindergarten. We have two new basements one for the girls and one for the boys. There are two domestic science rooms.

Laura May Yerkes, Fifth Grade.

Our Beautiful School

The new school is wonderful. The colors are bright. Which gives us plenty of light. I am glad to be in the new school. It's my delight. But please take care. So the new things will wear. Play safe and don't run down the stairs.

And take care of the new desks and chairs.

Assembly chairs are nice. They are pretty and smooth as ice. It's pretty too on the outside. Take care of the new school. And let it be our "Pride."

Margaret Smith, Sixth Grade.

Our New School

I think that everyone should be very proud of this new school which has just been completed a few weeks ago.

The children should all try to keep the new building as new and beautiful as it is now because other children will be using it in later years. The auditorium is especially nice and we are going to have talking pictures instead of silent ones. The domestic science room is new and convenient and the same can be said about the manual training room. All of the stairways are fireproof. Three new rooms have been built. There are new basements. A library and a special art room are now being used.

The improvements of the old and new buildings were made possible by

the Riverton taxpayers and by the Board of Education. Everyone should appreciate the new school and work hard with pleasure.

Jacqueline Pennington, Seventh Grade.

A few months ago, a new school was built in Riverton. To me it is a place, no, perhaps I should not call it a place; an institution where finer young men and women are being moulded. It was made possible by a number of Riverton citizens who saw far enough into the future to see the distinct advantage it would afford to the children and to the community.

Some advantages of the improved building are: a study hall with complete reference material, up to date manual training and domestic science quarters, a bigger and better auditorium with sound "movies" to increase your knowledge on such subjects as are being studied every day, healthier classrooms, fireproof halls, and a building which is attractive as well as entirely useful.

In order to protect the building given to the community the students must be cooperative at all times. It must be realized that the preservation of the school for the years to come depends on the ability of the pupils to keep it clean and free from damage.

A sincere expression of your gratitude would be to become a desirable citizen.

Weston Goodnow, Eighth Grade.

Holland has established a speed limit of 12½ miles an hour in cities.

ADVENTURE HI-Y CLUB MEETING

The Colored Adventure Hi-Y, so named because of its desire for adventure, met Thursday night, January 16, at Taylor's cabin in East Riverton.

After the conducting of business Charles W. Ray, one of the faculty members of Palmyra High School, spoke on the subject of "Adventure."

Mr. Ray gave very helpful and inspiring thoughts on adventure and left the boys with a host of ideas to be brought about in the future. After Mr. Ray's interesting talk the group was served with a collation. The rest of the evening was spent in the playing of games.

FEATURES OF NEW SCHOOL BUILDING

Plans as Finally Revised Cut Carrying Cost Yet Provide Adequate Space

The original plans and specifications for alterations and additions to the Riverton public school building, as advertised for bids in the first instance included certain alterations to the old building and the addition of a new auditorium and four classrooms on the ground floor. In that section in the ground floor plan immediately over the front entrance, there were to be two additional stories of construction, housing a new principal's office, a new teachers' room and lavatories for the boys and girls.

After two attempts to receive bids that would follow the plans and specifications as originally adopted, it became evident that the board of education would either have to secure an additional appropriation or revise the plans. Giving the matter serious consideration the board felt that the construction that might be called the tower, housing the new principal's office, teachers' room and two lavatories might be dispensed with as well as brick walls and concrete floors in the corridors of the old building.

Tower Eliminated

In eliminating the so-called tower construction the board felt that while it would be desirable to have the features provided in this construction, they could be dispensed with thereby reducing the annual maintenance expense on the building, as well as effecting a saving in the construction cost.

It would mean that there would be four less rooms to heat, light and take care of.

The subject of fire protection was carefully considered.

The plan for providing an adequate measure of safety to the children resulted in the following: brick enclosed stairways from ground to top floor, all-steel stair construction

with slate treads and stair landings, aluminum doors separating the fireproof stair towers from the rest of the building construction. These doors are kept continually closed with door checks. They are covered with fire-resisting sheet steel, and glazed with fire-resisting wire glass.

Thus in the event of fire it is but a matter of seconds until the children can step from their classrooms and, within the protected fireproof stair towers at either end of the building. As an additional safety check, one-inch fire-resisting tongue and grooved gypsum ceiling plank is built into the ceiling in every corridor, thus protecting the floors above from rapid ignition in the event of fire.

Fire Protection

A two-inch fire line of copper pipe, open at all times, runs throughout the building terminating in four fire hose cabinets. Each of these cabinets contains 100 feet of linen fire hose with a nozzle and hand-operated valve to start the water. In a recent test of two of these fire lines conducted by the Riverton Volunteer Fire Company, the nozzles with only city pressure behind them, threw a stream of water that reached from the ground to the top of the three-story construction, thus in the event of fire discovered soon enough the janitors or fire company are equipped to rapidly check or extinguish it.

With the length of hose provided with each, the nozzle could be taken to any point in the building. In addition to the fire hose equipment two-and-a-half gallon soda and acid type fire extinguishers are placed at strategic points throughout the building.

The fire alarm boxes of the "break-glass" type are located on all floors at key points.

New Electric Wiring

The electrical wiring of the knob and tube type in the old building which was found, previous to the improvements, to be hazardous, was dispensed with. In its place 83 armored cable has been used exclusively in both the old and the new construction, thus the danger of fire resulting from faulty and

exposed wires has been reduced to the very minimum.

The board of education feels that great strides have been made in providing reasonable safety features to the occupants of the school building with new ones of modern design and construction.

Much consideration was given to the subject of heat for the building. Several members of the board and of the Town Meeting committee made a survey of the heat problem in schools in New Jersey and Pennsylvania.

The Heating Unit

The bids called for alternates on unit ventilating and mechanical warm air, and contained an alternate for oil burning equipment. It was felt that the heating plant serving the old building might be costly to maintain after twenty-five years of service. It was also thought that since the old building was already piped with fresh-air and foul-air ducts, and since mechanical warm air is being used extensively in new school construction throughout the country, it would be better to provide new and larger warm air fur-

naces and heat the building from one central unit rather than to operate a steam boiler as well as the four old furnaces for the old building. It was therefore decided to replace the old warm-air furnaces with new ones of modern design and construction. The American Heating and Ventilating Company, who built the first ones in 1910, were the successful bidders for this type of heat. It was necessary, because of the larger furnaces, to dig a pit in the furnace room. Ventilation is provided by means of a large capacity squirrel cage or multi-blade fan.

Ventilating Fan

This fan is operated in a fresh air room and draws air from the outside, forcing it through the furnaces to be heated and then to the various rooms. Return ducts from each room draw the foul air back into a foul air chamber where it is forced through a foul-air exhaust duct, and since mechanical warm air is being used extensively in new school construction throughout the country, it would be better to provide new and larger warm air fur-

naces and heat the building from one central unit rather than to operate a steam boiler as well as the four old furnaces for the old building. It was therefore decided to replace the old warm-air furnaces with new ones of modern design and construction. The American Heating and Ventilating Company, who built the first ones in 1910, were the successful bidders for this type of heat. It was necessary, because of the larger furnaces, to dig a pit in the furnace room. Ventilation is provided by means of a large capacity squirrel cage or multi-blade fan.

These thermostats are controlled by compressed air bellows connected in the furnace room to what is called a mixing damper, thus if the temperature exceeds the heat called for in a particular room compressed air is released to the bellows of the mixing damper which closes heat in the room and draws air from the outside, forcing it through the furnaces to be heated and then to the various rooms. Return ducts from each room draw the foul air back into a foul air chamber where it is forced through a foul-air exhaust duct, and since mechanical warm air is being used extensively in new school construction throughout the country, it would be better to provide new and larger warm air fur-

warm air, the American Heating and Ventilating Company, of Philadelphia, at a total cost of \$4,380; plumbing and draining, Lewis Leyman, of Audubon, at a total cost of \$4,703; electrical work, Roland E. McMahon, of Woodbury, at a total cost of \$4,045. The awards were made subject to the approval of the state engineer for the Public Works Administration.

The board of education approved the bond and the contracts of the successful bidders on the project at a meeting held July 11th. The motion was offered by Hilton M. Smith, chairman of the building committee, and passed unanimously.

On Monday, July 15th, ground was broken and construction began. The work on the building continued rapidly with the Rafferty-Kennedy Company employing two shifts, totaling almost forty men.

Progress on the building and alterations continued apace and school was opened in the old building on Monday, October 7th.

All classes started with the exception of the kindergarten.

In order to make up the lost time occasioned by the building program, classes convened fifteen minutes earlier than usual in both the morning and afternoon sessions.

On Tuesday, October 1st, the cornerstone in the Fifth street wall of the new section was laid with due ceremony. The faculty and students of the Riverton Public School gathered for the occasion and the ceremony started at 2 o'clock in the afternoon.

Mrs. Marion R. Elwell, president of the board of education, placed papers in the copper box within the cornerstone bearing the figures 1935.

The papers included a list of the faculty, a list of the board of education members, a list of the town meeting committee, names of members of the police force, several issues of The New Era containing stories of the project, the program of the 1935 graduation class, the aims and objectives of the Riverton Public School and the photograph of the architect.

Miss Caroline M. Straman, principal of the school, addressed the group and applied the mortar which sealed the stone in its place.

Previous to occupying the building on October 7th, a temporary acceptance was made by the board of education.

The board of education met on an average of once a week from the time of the acceptance of the PWA loan and grant agreement. Towards the completion of the building program, the board turned its attention to the procurement of equipment, which too under the agreement came in for a 30% share of PWA funds in its purchase.

In the early part of December the first installment of \$12,285.25 of the PWA grant was received by the District Clerk. The final installment is in the process of official approval.

The Riverton Board of Education sold the portable building located on Cinnaminson street to the Pemberton Board of Education for the sum of \$500, after receiving no response following an advertisement offering the school at public sale some weeks before.

In a special meeting held Thursday, January 23rd, the Riverton Board of Education, upon receipt of the architect's certificate of completion, passed a resolution finally accepting the building as of that date.

Minor PWA violations having been satisfied to the complete satisfaction of the Public Works Administration authorities settlement was made in the offices of the board's solicitor on Tuesday, January 28th, 1936. This officially brought to a close the alteration and addition project with the exception of the equipment items.

Each of the five contractors has placed the board of education with a one-year maintenance bond to cover any defects that might develop during the life of the bond.

The project from beginning to end has not gone beyond the total voted for by the voters of Riverton plus the Government grant of \$23,000.

No European nation except Great Britain has important possessions in North America.

EXPLANATION OF P.W.A. AND W.P.A.

Ely Shows Difference in the Operation of Two Federal Project Plans

Replying to a public inquiry by a newspaper as to the difference between the WPA and the PWA, William H. J. Ely, State Administrator of the Works Progress Administration, recently made the following explanation:

"The Works Progress Administration, sometimes referred to as the WPA, is primarily organized to develop and operate a program of work which will absorb the largest possible number of employables from the relief lists in the shortest possible time. The Works Progress Administration is also charged with certain coordinating functions which involve other endeavors operated by other Federal agencies that are financed by funds made available under the Emergency Relief Appropriation Act of 1935. These coordinating functions are concerned primarily with certification as to the available relief labor in the community or district where the proposed projects are to operate, and also with the scheduling of the commencement of projects to conform with the available supply of relief labor."

"The work program administered by the Works Progress Administration is largely conducted on a force account or day labor basis, rather than on the basis of the awarding of contracts."

"The projects operated by the Works Progress Administration are under the sponsorship of units of State or local government, who are called upon to participate in the project cost. The Federal share of the cost of the Works Progress Administration projects is financed entirely by the Federal Government through the State and district offices of the Works Progress Administration."

"The Federal Emergency Administration of Public Works, commonly known as the PWA, is a program of work, involving comparatively large types of construction, employing in the main skilled labor, and these types of construction are operated on the basis of contracts let in the normal and usual way. The financing of PWA projects is through the medium of a combination of loans and grants by the Federal Government to the units of State or local government sponsoring the project, the maximum grant being 45 per cent, with the remaining balance in the form of a loan repayable over a period of years, and bearing interest."

"Forty-five per cent grants only may be extended by PWA to public bodies, who must support the rest of the financing themselves."

Nearly one-third the population of central and southern Chile is German.

A writer says that in a recent visit to an English village he was swept off his feet by the beauty of the place. Blonde or brunette?

RAYCROFT'S CORNERSTONE

C. W. Raycroft, R.E.I.F.E.A.P.W. (Resident Engineer Inspector Federal Emergency Administration of Public Works) we call him the R.E.I. for short, has his own little cornerstone in the addition to the Riverton Public School. As a matter of fact it can't be called a CORNERSTONE because it is not in a corner, and, come to think of it, it isn't called a cornerSTONE because it is not a stone, it's brick. But for the lack of knowing what to call it we'll say it's a miniature cornerstone.

Every man in business or profession seems to have a peculiar "twist" for saving things. In some corner of his desk drawer you will find an assortment of second-hand rubber bands of all sizes, shapes, texture and color. Others like to save and collect paper clips from the incoming mail. Some, we'll grant you, are slightly rusted and badly bent but still they are saved and never used.

Raycroft had to find expression for this "twist" common to all mankind and it settled in the happy idea for a private cornerstone. How or where he got it from we don't know, but quite unobtrusively a common brick appeared on his desk. A brick of the same dimensions, material and color of the thousands used in the building, but it was hollow in the center and had a little copper lid to fit. On the exposed face the figures 1935 were stamped and baked into the brick.

Those who had business in connection with the construction of the building were "collared" quite unexpectedly and after being led to a corner of the room would be invited in a lowered voice by Raycroft to donate an autographed name card for his cornerstone.

As the work progressed, the name cards piled up until one day the brick was missing.

The cornerstone was evidently laid, but not with all the pomp and circumstance that usually attends a cornerstone laying. As quietly as it appeared, it disappeared, and thus a novel "twist" had been satisfied.

If you think this story is "phony" take a look at the bricks over the front entrance to the auditorium several courses from the top of the wall. If you see one bearing the figures 1935, you will know it's Raycroft's cornerstone.

And if you still think it's "phony"—well skip it—we can't tear the building down to prove it.

"Quid Rides."

**NOVEL METHOD OF
THAWING OUT CAR**

An original plan to thaw out an automobile motor by building a fire underneath the car turned out to be highly unprofitable and completely unsuccessful last Saturday.

Oscar Roberts, of Broad street, East Riverton, conceived the idea that building a fire under his frozen automobile would be a good scheme to thaw the motor out.

The little fire turned into a big one and the car, as well as the garage in which it was housed, were both destroyed by flames.

Firemen of Parry, under the direction of Chief George Adams, and Riverton firemen under direction of Chief Ezra Carhart, answered the alarm. Damage is estimated at more than \$300.

RESOLUTION
January 24, 1936.
Mrs. Benjamin Lippincott,
Riverton, New Jersey.

Dear Mrs. Lippincott:
The Township Committee of Cinnaminson at the close of its meeting held in the fourteenth of January 1936, felt a strong desire to express their appreciation of the many years of service of our neighbor, Mr. Benjamin Lippincott, on our Township Committee, of his great interest in our Public School, and in general in all the affairs of our neighborhood.

Consistently Mr. Lippincott rendered service without regard to reward and in so doing set a fine example to our citizens.

Sincerely yours,
George C. Frank,
Township Clerk.

CINDER CONCRETE BUILDING UNITS USED IN SCHOOL

In June, 1921, Cinder Concrete Building Units, made under the Straub Patent, were introduced in this territory by the Concrete Specialties Company, of Camden, N. J. These blocks, as they are commonly termed, in a very short time became the most popular building units that have ever been introduced to the trade. The demand grew until the output of the Plant in Camden, during 1924 and 1925 assumed the immense proportion of the equivalent to 2,500,000 eight-inch units per year.

The popularity of this cinder concrete unit was due to qualities which it possesses that no other product of the Concrete Industry could boast of, namely: nailability, light weight, damp proofness, insulation from heat and cold, and, most important, the sound-proof qualities which are of the highest.

This business is now being carried on by The Cinder Concrete Block Corporation who are still maintaining the high quality of the product as specified by the original Straub patent.

The old popular Straub Cinder Concrete Unit in all of its many sizes and shapes can still be purchased at the plant in Camden.

The partitions in the addition to the school in Riverton were built of four-inch cinder units, and it was due entirely to their sound-proof qualities that the selection was made by the architect.

ANNOUNCEMENT
Mrs. Ruth Parsons Strahan, a member of the faculty of the Philadelphia School for Expression and Dramatic Art announces in this issue of The New Era the opening of classes in Palmyra.

Mrs. Strahan, who will conduct classes at 922 Parry avenue, Palmyra, is well known throughout South Jersey for exceptional and original monologues.

Features of New School Building

(continued from page 9)

Heating Plant Adequate

In the recent bitter cold weather that has forced many schools to close because of inadequate heating facilities, the new heating plant kept all of the rooms in the school at a temperature of 72 degrees, and with a single room overheat. The janitor reported that even in the sub-zero outside temperature the heat was maintained without forcing the furnaces to anything near their maximum capacity. Thus it has been conclusively proved that the heating plant is more than adequate for almost any heating emergency.

For the past twenty-five years chestnut size coal has been used to heat the building. This year, with the new furnaces burning buckwheat coal, it is expected that a favorable comparison will be established, considering the increased area to be heated.

Construction Features

The main features of construction in the new section constitute heavy reinforced concrete footings, brick walls, steel ceiling rafters, concrete slab roof, plaster on metal lath, concrete floors finished with moultrie flooring. The auditorium is supported by a heavy skeleton steel fabrication, with brick walls outside and glazed tile interior finish, concrete floors finished in maple. A moving picture booth located overhead at the main entrance, constructed entirely of sheet asbestos and steel frame-work, is provided. An auxiliary ventilating fan is built into this booth.

A large stage with improved wings is built in the opposite end. Dressing rooms directly overhead and on either end of the stage with spiral steel stairways present improved stage facilities.

The Auditorium

The auditorium has a seating capacity of four hundred and fifty people and was built to provide for physical training requirements of the

school as well as auditorium facilities. The auditorium is a feature of the new school project, the prospectus stating that Riverton has not recently had an adequate meeting place for civic use. The board of education will therefore encourage its use for community purposes.

The kindergarten room at the present time occupies space that is intended for two classrooms. Folding doors permit this room to be cut in two to take care of additional needed classroom space when the enrollment demands it.

The kindergarten children have their own lavatories, wash stand and drinking fountain. A fireplace to create a home-like atmosphere has been built in one of the classrooms. This makes a realistic appearance when illuminated by the most luxuriant burning buckwheat coal, it is expected that a favorable comparison will be established, considering the increased area to be heated.

Manual Training Room

The space formerly occupied by the old auditorium has been converted into two large classrooms, housing a manual training and domestic science room. The building has been raised to a level with the other floors on the ground floor plan. These rooms are larger and better lighted, and provide more storage space for equipment incidental to these studies.

The space formerly occupied by the domestic science room has been rebuilt into a new and improved girls' lavatory, with new concrete floors and complete modern toilet-room fixtures.

The space formerly occupied by the boys' and girls' lavatory in the old building has been rebuilt into a new and larger boys' lavatory, completely equipped with new and modern fixtures.

Each of these new lavatories is equipped with unit exhaust ventilating fans.

The kindergarten room in the old building has been converted into a library, which will also serve as the board room in the future.

The foul-air shaft which for years has been of exposed wooden construction has been lined with tongue

and grooved fire-resisting gypsum plaster. The roof of the old building has been reinforced for a distance of eight feet back from the parapet wall, and the roof of the new building constructed of Carey Roofing Company, materials, is bonded for twenty years of service.

The Electrical System

The electrical system includes four lighting fixtures for each classroom, an electrical meter clock and buzzer system to each classroom, outside assembly bells wired to the master clock, and a telephone system from the office to each room and fire alarm has been installed. Each room has been wired for electrical clocks and when they will be provided by the board.

Copper pipe with sweated joints have been used in all the plumbing in both the old and the new building. Plumbing fixtures throughout are new.

The outside grounds immediately in front of the new building and along the Howard street side have been graded with top soil, and will be planted with grass in the spring.

A skeleton plan of evergreen planting has been contracted for with the R. R. Leach Nurseries, of Riverton. This planting will take place when the freeze period has passed.

"POLITICS"—A NEW MAGAZINE

The first issue of "Politics," New Jersey's political magazine, will be ready for the printer in a few weeks. An office will be maintained at 241 Main street, Hackensack, N. J., and representatives in Washington and Trenton.

Burr C. Molar has been selected to edit the new publication. He has had many years of newspaper experience and recently has been editing newspapers in Bergen County.

The publication will be non-partisan, it will comment on matters before the legislature, on national politics insofar as they affect New Jersey, and on activities of the county and state committees.

Indignation is a comfortable form of hatred.—Bertand Russell

RIVERTON'S FIRST BIG SCHOOLHOUSE

Located on the corner of Fourth and Howard streets was built in 1892 by Grant and Lowden, contractors, at a cost of \$4,400.00 with \$500 extra for heating plant and \$175 extra for lavatories.

CONGRATULATION

Riverton can be justly proud of its new school facilities, and through them it has further advanced its high position in the desirable residential communities suburban to Philadelphia.

665, with a loss of \$63,135, covered by insurance totaling \$251,364. The value of contents was \$101,546, with a loss of \$37,960, covered by insurance of \$83,196.

The following departmental bills were approved and ordered paid: Revenue and finance, \$2,833.12; public affairs, \$6,096.89; public buildings, \$12,164.47; highways and engineering, \$1,053.27; bridges, \$2,584.29; total, \$35,664.04.

An Ohio baker is turning out bread in dated packages with a different colored wrapper for each day of the week—their making it clear whether the bread is stale or fresh.

Sales of stamps by the philatelic agency of the Post-office Department amounted to more than \$800,000 last year.

NOTICE

Notice is hereby given to the legal voters of the School District of the Borough of Riverton, of the County of Bergen, that the annual meeting for the election of three members of the Board of Education will be held at the School House, on TUESDAY, FEBRUARY 11, 1936 from 7:00 o'clock p.m. to 9:00 a.m. and as much longer as may be necessary, to enable all the legal voters present to cast their ballots.

Three (3) members will be elected 3 years, and meeting will be submitted the question of voting a tax for the following purposes:
For current expenses \$31,195.00
For repairs and replacements 1,000.00
For bond redemption and interest on bonded indebtedness 6,500.00
The total amount sought \$38,695.00
Dated this Thursday day of January, 1936.
WILLIAM H. BUTTER, District Clerk.

NOTE—The term "current expenses" includes principal, teachers', janitors' and medical inspectors' salaries, fuel, textbooks, school supplies, bags, transportation of pupils, tuition of pupils attending schools in other districts with the consent of the Board of Education, school libraries, compensation of the District Clerk, of the custodian of school moneys and of transient officers, transient schools, insurance and the incidental expenses of the school. Board of Education, shall be at least 21 years of age, a citizen and resident of the school district, and shall have been such a citizen and resident for at least three years immediately preceding his or her becoming a member of said Board. Persons legally nominating candidates to be voted on at said meeting, must be filed with the District Clerk at least twenty days before the date of the meeting, in order to be eligible to vote on the official ballots to be used in voting. In calculating the above-named twenty days either the filing day or the election day but not both may be counted. Blank forms for this purpose may be obtained from the District Clerk. Persons who may vote in addition to those required for the last preceding general election are those who register at the polling place on the Saturday evening preceding the day between the hours of 9 o'clock p.m. Any person may register who is qualified to vote in that district for a member of the legislature.

RIVERTON

FIREMEN ON DUTY ALL NIGHT

Much credit is due to the firemen who gave up their sleeping hours and remained on duty at the fire house subject to call during the very cold nights last week and this, in order that Riverton residents might be fully protected in case of fire.

The members of the fire company who volunteered for this duty were: Chief "Butts" Carhart, William Seagrave, Charles Perkins, Joseph Sotham, Walter Scattergood, Frank Goodwin, James Burns, George Recker, Henry Rosen, Albert Wigmore, Giles Knight and Joseph Leach.

Custom moulds conscience.

Objectives of the Riverton Public School

The prime objective of any form of public education should be the fitting of the student to occupy his or her proper niche in society, with due consideration for the future economic and social welfare of both pupil and society. Fully realizing that the former is a general principle, the following detailed outline is submitted, based on the above as a justifiable principle.

The faculty of Riverton school is striving towards the following objectives:

Health
1. Preservation and promotion of physical well-being.
2. Development of a well integrated personality through safeguarding emotional health.
3. Adequate provision for intellectual growth and development.

Ethical Character
1. Incultation of desirable attitudes, appreciations and ideals.
2. Reverence toward the spiritual.
3. Courtesy in speech and action.
4. Honesty in word and deed.
5. Maintenance of a cheerfulness of manner and a happy outlook on life.

Worthy Home Membership
1. Dedication to service in the interest of one's home, one's friends, and one's community.
2. Intelligent participation in determining the policies of the home group.

Loyalty that shall be expressed through conduct that proceeds from a desire to promote the interests of the home and to reflect credit upon it.
4. An appreciation and understanding of all the influences which make for a happy and successful home life.

Fundamental Processes
1. The endeavor to teach the essentials in knowledge, skills, habits, attitudes and ideals.
2. Conscious and habitual use of the laws of learning to stimulate and direct the continual growth of the individual.

3. The ability to think, to question critically, to evaluate.
4. Expression of one's self with clarity, force and conviction.

Vocation
1. The habit of efficient and persistent application to useful work.
2. The endeavor to give to each student an understanding of his own abilities and interests and an opportunity to explore various fields of learning and to prepare himself for the one for which he seems best fitted.

3. An appreciation of the interdependence of all vocations.
Worthy Use of Leisure
Provision for the development of:
1. Love of scholarship which is careful and exact.
2. A sincere appreciation of nature, literature, art and music.
3. Appreciation of the beautiful as an intimate and integral part of one's life.

4. Education for Citizenship
1. Development of an adaptable, self-reliant individual able to face changing conditions.
2. Self-discipline of sufficient power to control thought, speech and action.
3. Development of an active member of a democratic community, a socially efficient citizen.

4. Growth and tolerant understanding which will produce good citizens and the improvement of the social order.
The aim of education should be "to raise the standard of daily living, to direct thought toward the contemplation of something better and purer than worldly pleasures or gain, and so fit the individual to achieve a good mental standard rather than to merely earn a living."

In the Surrey village of Tatfield, Miss Francis Watts is engaged in a unique occupation—that of breeding spiders to spin silk used in scientific instruments.

OBITUARIES

MRS. MARY OWENS

Mrs. Mary A. E. Owens, 75, wife of Rev. Marshall Owens, retired clergyman, who was formerly pastor of the Episcopal M. E. Church in Palmyra, died Saturday at her home, 31 South Fernwood avenue, Pitman, after an illness of two weeks. Her husband who retired several years ago after closing his pastorate at the Chelsea-Ventnor M. E. Church, Atlantic City, had also filled charges in Mt. Holly, Camden and Wenonah.

Mrs. Owens, a native of Worcester, England, attended the South Henley School for Girls in that country. Besides her husband, she is survived by a son, Dr. John S. Owens, Camden dentist, resident in Pitman, and four daughters. They are Mrs. Edith M. Fogg, of Woodstown; Mrs. Alice Wadsworth, of Moore, Pa.; Mrs. Maude Updike, of Trenton, and Mrs. Mary Hemphill, of Margate City.

Funeral services were held in the home Tuesday, 1 p.m. Burial was in Richmond Cemetery, near Pitman.

MRS. CLARA VALENTINE

Mrs. Clara Valentine, of Warrington avenue, East Riverton, died Monday at the home of her son, John, after a short illness.

Funeral services will be held Friday at 2 o'clock from the Snover Funeral Home, the Rev. William A. Boyd officiating.

Interment will be made in New Camden Cemetery, Frank A. Snover, funeral director.

MRS. KATE CHAMBERS

Mrs. Kate Chambers, mother of Mrs. Filson Graff, of 300 Eighth street, died at the home of her daughter, Sunday, January 26. Funeral services were held Wednesday morning at 11 o'clock from her late residence, the Rev. Francis B. Downs officiating.

Interment was made in Monument Cemetery, Beverly, Frank A. Snover, funeral director.

DUSEK vs. KOVERLY

IN CAMDEN RING

Two of the Roughest Men in the Grappling Ring Scheduled in Tonight's Tilt

Ernie Dusek, of Omaha, is ready to answer the bell against George Koverly, of Hollywood, in the feature two out of three fall, ninety minute time limit bout at the Camden Armory, Haddon avenue and Middle street, Thursday night. The patrons are well aware of the fact that both Ernie and George are two of the roughest men in the grappling realm and it is nothing for them to step out of bounds in their quest for victory.

On top of that, Dusek has an old score to settle with the California pugilist. He hasn't forgotten the time that Koverly jumped into the ring and took a clean cut punch at him while he was waging a winning duel with Al Bisgano, three weeks ago. Decidedly, Dusek again pinned Bisgano at the shed last week.

Koverly kept step with Ernie, for he also won his tiff in the semi-final. The other two half hour duels, also scored a smashing win over Lawrence Baxter.

Carl Van Worden, of Canada, will show before Camden fans for the first time in four years, when he takes on Freddy (Legs) Grubmeier, in the main half-hour preliminary.

The other two half hour duels, also should furnish plenty of excitement for Irish Jack Donovan, of

Draw Up a Comfy Chair

And do a little winter fireside gardening—checking in the 98th Annual Edition of Deere's Garden Book the Vegetable and Flower Seeds needed in spring (some like the Madagascar Periwinkle you may wish to start indoors very early). Of course, the blanks left by winter in the hardy border can always be replenished with healthy plants from the Deere Nursery in spring.

Tune up your plantings with a few of the Recommended Seed Novelties—never before offered.

DREERS

Open weekdays from 8 a.m. until 5 p.m., and on Sunday (but not for business) from 1 until 5 p.m.

RIVERTON SCHOOL NOTES

Mr. Bush's eighth grade is preparing a play called "Abraham Lincoln, the Rail Splitter," which will be given in assembly February 7th. George Bishop, Howard Gibson and Doris Mullen are in charge of the scenery.

A unit will be given to the eighth grade social studies group this week which will cover the historical and geographical background of New Jersey in connection with the Constitution of the United States.

Several exhibits for the State Science Fair, in Trenton January 28th to 31st, are being made under the supervision of Francis Klevan, a practice teacher from Trenton Teachers' College. Bob Waters, Tom Mooney, Miriam Gorman and Emma Rotenbury are working on a demonstration model of the water cycle. An exhibit on the working of pumps is being made by George Bishop, Bolton Elwell, and Howard Gibson. Weston Goodnow, Burke Jay, William Robinson and Harold Bishop are working on an exhibit entitled "Our Solar System." With

the help of Mr. Sloan they have cut the planets out of heavy paper, and blue cellophane to form the background. Strings from the planets to the sun have little signs with the distances printed on them. The whole exhibit presents the appearances of an electric sign. The rela-

tive sizes of the planets will be shown. This is also going to the State Science Fair.

Ann Harding, movie actress, who is fond of horseback riding, has had a steeplechase track built on her estate.

PUBLIC SERVICE

HEALTH PLAY FOR P.T.A. STUDY GROUP

Pupils of Riverton Public School Dramatize Health Rules at Meeting

A regular meeting of the Child Study Group of Riverton Parent-Teacher Association was held Monday, January 27. A group of girls from the seventh and eighth grades of the public school presented a health play written in rhyme by Doris Crouse and Hilda Webb, which was previously presented during a school assembly to impress upon the younger children those

things which contribute toward good health.

Various girls in appropriate costumes represented exercise, cereal, vegetables, fruits, milk, bread, proper clothing and sleep. All of the scenery used was made by the group.

Following the play Miss Caroline M. Staman led a discussion on the value of such an undertaking to the children who participated and those who were in the audience. Important among the benefits to the girls in the play were cooperation, fair play, intelligent use of leisure time, poise, posture, diction and development of initiative. It was felt the health lesson presented in such an entertaining way made a more lasting impression on the younger children than could have been accomplished by merely telling them about the many contributing factors which lead to good health.
