As Elizabeth passed the park gates in her motor, a young man rode out into the road. His horse was nervous, and chose to take fright at the big car. Elizabeth did not see clearly just what happened, which was not surprising, as she shut her eyes and placed her fingers firmly in her ears as the horse began to plunge.

To be quite fair, however, Elizabeth recovered quickly, and flinging open the window, ordered Richards to pull up instantly. She then dismounted, splendidly Directoire as she was, and ran quickly through the mud to where the young man lay in the midst of a

Sun and Fire Symbols.

There are to be found occasionally upon the walls of old brick houses, at about the line of division between the first and second stories, flat pieces of iron five or six inches in length and shaped somewhat like the letter "S."

The use of these articles was clearly brought from England, where it is still continued, and there is a curious origin and meaning attached to them.

The figure in question is an early The figure in question is an early symbol of the sun. It is still used in Herefordshire and other parts of Eng-land. There one is informed that the reason for the particular form of these irons is that they were made thus in order to protect the house from fire as well as from collapse.—Harper's Weekly.

In Spain, as is well known, a vigor-ous etiquette governs the business of love-making. A young man cannot interview his sweetheart without her parents' consent, and, indeed, all con-versation openly carried on between the couple must be in the presence of the fair one's mother.

Many subterfuges are adopted by the lovers to overcome this difficulty, and the "reja"—the ornamental ironand the reja.—the ornamental iron-work on the windows of Spanish houses—has become one of the favor-ite trysting places. Mr. Fred. P. Hemphill. Dear Sir-

Your favor of the 24th came duly to hand. I note you state that you were appointed August 25th, 1911 for two years which appears to be born out by

your certificate.
You will recall in my article, I call attention to The New Era's article wherein it states that the Board was appointed August 16th, 1912 and stated that it appears odd. And while there L. F. Lowden has the contract to build a double house for D. D. Bastian in 1911, yet is it not odd that a newspaper article should appear stating you and others were appointed in 1912? You will note that until your resignation from the Board there was no Republican representative thereon which you must admit is contrary to the intent of the act appointing elec-tion officers and manifestly unfair to

the Republican Party. CHAPTER XXV.

The Train Wrecker.
The train-butcher, entering the Observation Room, found only a loving couple. He took in at a glance their desire for solitude. A large part of his business was the forcing of wares on people who did not want them.
His voice and his method suggested the present of the property and the present of the p

the mosquito. Seeing Mallory and Marjorie mutually absorbed in read-ing each other's eyes, and evidently something else to read, the train-butcher decided that his best plan of autack was to make himself a nuis-ance. It is a plan successfully adopt-ed by organ-grinders, street planists and other blackmallers under the guise of art, who have nothing so welcome to sell as their absence. Mallory and Marjorie heard the

trant-boy's hum, but they tried to ig-"Papers, gents and ladies? Yes? io? Paris fashions, lady?"

He shoved a large periodical be-

tween their very noses, but Marjorie threw it on the floor, with a bitter glance at her own borrowed plumage: "Don't show me any Paris fash ions!" Then she gave the boy his conge by resuming her chat with Mal-lory: "How long do we stop at Og-

tioning his papers and magazines, and poking them into the laps of his prey. And they went right on talking to one another and pushing his papers to one another and pushing his papers and magazines to the floor.

"I think I'd better get off at Og-den, and take the next train back. That's just what I'll do. Nothing, thank you!" this last to the train-hoy.

Mallory urged excitedly, with a side glance of "No, no!" to the train-boy. "I can, and I must, and I will," Mar-jorle insisted. "I'll go pack my things

now."
"But, Marjorie, listen to me." "Will you let me alone!" This to the gadfly, but to Mallory a dejected wall: "I—I just remembered. I haven't anything to pack." "And you'll have to give back that

waist to Mrs. Temple. You can't get off at Ogden without a waist." "I'll go anyway. I want to get

"Marjorie, if you talk that way—I'll throw you off the train!" throw you off the train!"
She gasped. He explained: "I wasn't talking to you; I was trying to stop this phonograph." Then he rose, and laid violent hands on the annoyer, shoved him to the corridor, seized his bundle of papers from his arm, and hurled them at his head. They fell in a shower about the train-butcher, who could only feel a cer-tals respect for the one man who had ever treated him as he knew he deserved. He bent to pick up his scat-tered merchandise, and when he had gathered his stock together, put his head in, and sang out a sincere:

"Excuse me."

But Mallory did not hear him, he was excitedly trying to calm the excited gril, who, having eloped with him, was preparing now to elope back without him.

"Darling, you can't desert me now," he pleaded, "and leave me to go on

thing?" she retorted, in equal des-peration. "If I were a man, and i had the girl I loved on a train. I'd get her married if I had to wreck the—" she caught her breath, paused a second in intense thought, and then, with sudden radiance, cried:

"Harry, dear!"
"Yes, love!"

"Yes, love!"
"I have an idea—an inspiration!"
"Yes, pet," ather dublously from bim, but with absolute exuitation from her: "Let's wreck the train!"
"I don't follow you, sweetheart."
"Don't you see?" she began excitedily. "When there are train wrecks a lot of people get killed, and things. A minister always turns up to administer the last something or other ister the last something or other-

"Well?"
"Well, stupid, don't you see? We wreck a train, a minister comes, we nab him, he marries us, and—there we are! Everything's lovely!" He gave her one of those looks with which a man usually greets what

a woman calls an inspiration. He did not honor her invention with an-alysis. He simply put forward an ob-jection to it, and, man-like, chose the most hateful of all objections: "It's a lovely idea, but the wreck would delay us for hours and hours, and I'd miss my transport—" "Harry Mallory, if you mention that

"But, darling," he pleaded, "you can't desert me now, and leave me to go on alone?" She had her answer

"If you really loved me, you'd—"
"Oh, I know," he cut in. "You've said that before. But I'd be court-martialed. I'd lose my career." "What's a career to a man who

"It's just as much as it is to any-body else—and more."

She could hardly controvert this gracefully, so she sank back with grim resignation. "Well, I've pro-posed my plan, and you don't like it. Now. suppose you propose something."

proposed my plan, and you don't like it.
Now, suppose you propose something."
The silence was oppressive. They sat like stoughton bottles. There the conductor found them some time later. He gave them a careless look, selected a chair at the end of the car, and began to sort ifs tickets, spreading them out on another chair, making notes with the pencil he took from atop his ear, and shoved back from atop his ear, and shoved back from time to time.

Ages seemed to pass, and Mallory power, and smil had not even a suggestion. By this "Oh, I just the Marjorie's temper, had evaporate shopping there."

"Shopping! While the train waits

"You see," Marjorie fluttered, "by a sad mistake, my baggage isn't on the train. And 'I haven't any—any—I really naed to buy some—some things very backy. It's awfully embarrassing to be without them."

"I can imagine," the conductor mumbled. "Why don't you and your husband drop off and take the next train."

in?"
"My husb—Mr. Mallory has to be San Francisco by tomorrow night. He just has to!' "So have I."

"But to oblige me? To save me om distress—don't you think you ould?" Like a sweet little child she twisted one of the brass buttons on his coat sleeve, and wheedled: "Don't you think you might hold the train just a little tiny half hour?"

He was sorry, but he didn't see how he could. Then she took his breath away again, by asking, out of a clear sky: "Are you married?"

He was as awkward as if she had proposed to him, she answered for him: "Oh, but of course you are. The women wouldn't let a big. handsome. wisted one of the brass buttons on

She actually had her cheek almost against his shoulder, though she had to poise atiptoe to reach him. Mailory's dismay was changing to a boiling rage, and the conductor was a pitiable combination of Saint Anthony and Tantalus. "I—I'd love to oblige you," he mumbled, "but it would be as do. Remember, it's all for love of you—even if I have to kiss him."
"Marjorie, I won't permit—"
"You have no right to boss mo—yet. You subside." She gave him the mercat touch, but he fell backward into a chair, utterly aghast at the shameless siren into which desperamuch as my job's worth."
"How much is that?" Marjorle asked, and added reassuringly, "If

you lost your job I'm sure my father

would got you a better one."
"Maybe," said the conductor, "but—
I got this one."
Then his rolling eyes caught sight of the supposed husband gesticulating wildly and evidently clearing for ac-tion. He warned Marjorie: "Say, your husband is motioning at you." "Don't mind him," Marjorie urged,

"just listen to me. I implore you.

I—" Seeing that he was still resisting, she played her last card, and, crying, "Oh, you can't resist my prayers so cruelly," she threw her arms around his neck, sobbing, "Do you want to break my heart?"

Mallory rushed into the scene and

the conductor, tearing Marjorie's arms loose, retreated, gasping, "No! and I don't want your husband to break my head."

Mallory dragged Marjorie away, but

she shook her little fist at the conductor, crying: "Do you refuse?" Do you dare refuse?" "I've got to," the conductor abject-

ly insisted.
Marjorie blazed with fury and the siren became a Scylla. "Then I'll see that my father gets you discharged. If you dare to speak to me again, I'll order my husband to throw you off this train. To think of being refused a simple little favor by a mere con-ductor! of a stupid old emigrant train!! of all things!!!"

MARJORIE ASKS THE CONDUCTOR TO HOLD THE TRAIN SO SHE

His curt indifference joited Mar- and po orie a triffe, but she railied her forces, in a ta and came back with; "How long do we stop at Ogden?" "Five minutes," very bluntly.

Marjorie poured maple syrup on her tone, as she purred: "This train of yours is an awfully fast train, isn't

"Sort of." said the conductor, with just a trace of thaw. What followed made him hold his breath, for the outrageous little hussy was actually saying: "The company must have a great deal of confidence in you to en trust the lives and welfare of so many people to your presence of mind an courage."

"Well, of course, I can't say as to that—" Even Mallory could see that the man's reserve was melting fast as Mariorie went on with relentles

"Talk about soldiers and firement and life-savers! I think it takes braver man than any of those to be a conductor—really."

"Well, it is a kind of a responsible

job." The conductor swelled his chest a little at that, and Marjorie felt that

he was already hers. She hammered the weak spot in his armor: "Responsible! I should say it is. Mr. Mallory is a soldier, but soldiers are such ferocious, destructive peo-ple, while conductors save lives, and —if I were only a man I think it would be my greatest ambition to be

would be my greatest ambition to be a conductor—specially on an overland express."

The conductor told the truth when he confessed: "Well, I never heard it put just that way." Then he spoke with a little more pride, hoping to increase the impression he felt he was making: "The main thing, of course, is to get my train through On Time!"

This was a facer. He was going to get his train through On Time just to oblige Marjorie. She stammered: "I don't suppose the train, by any accident, would be delayed in leaving Ogden?"

CHAPTER XXVII.

The Dog-on Dog Again.
As the conductor left the Mallorys
to their own devices, it rushed over him anew what sacrilege had been athim anew what sacrilege had been at-tempted—a fool bride had asked him to stop the Trans-American of all trains!—to go shopping of all things! He stormed into the smoking room to open the safety valve of his wrath, and found the porter just coming out of the buffet cell with a tray, two hol-low-stemmed glasses and a bottle swaddled in a napkin.

"Say. Elisworth what in —— do

"Say, Ellsworth, what in — do you suppose that female back there wants?—wants me to hold the Trans-American while—"

But the porter was in a flurry him-self. He was about to serve cham-pagne, and he cut the conductor short: "Scuse me, boss, but they's a lov-in' couple in the stateroom forward that is in a powerful hurry for this. I can't talk to you now. I'll see you later." And he swaggered off, leaving the door of the buffet open. The ing the door of the buffet open. The conductor paused to close it, glanced in, started, stared, glared, roared: "What's this! Well, I'll be—a dog smuggled in here! I'll break that coon's head. Come out of there, you miserable or nary hound." He seized the incredulous Snoozleums by the scruff of this neck, growling, "It's you for the baggage car ahead," and dashed out with his prey, just as Mailory, now getting new bearings on Marjorie's character, spoke across the rampart of his Napoleonically folded arms:
"Well, you're a nice one!—making

"We'll, you're a nice one!—making violent love to a conductor before my very eyes. A minute more and I would have—" She silenced him with a snap:

She silenced him with a snap:
"Don't you speak to me! I hate you!
I hate all men. The more I know
men the more I like—" this reminded
her, and she asked anxiously: "Where
is Shoozleusns?"
Mallory, impatient at the shift of
gubject, snapped back: "Oh, I left him
in the buffet with the waiter. What I'
want to know is how you dare to—"
"Was it a colored waiter?"
"Of course. But I'm not speaking

of—"
"But suppose he shoule bite him?"
"Oh, you can't hurt those nigger waiters. I started to say—"
"But I can't have Snoozleums biting colored people. It might not agree with him. Get him at once."
Mailory trembled with suppressed rage like an overloaded boiler, but he gave up and growled: "Oh, Lord, all right. I'll get him when I've finished—"
"Go set him this missien."

"Go get him this minute. And bring the poor darling back to his mother."

"His mother! Ye gods!" cried Mallory, wildly. He turned away and dashed into the men's room with a furious: "Where's that damned dog?"

He met the porter just returning. The porter smiled: "He's right in heah, sir," and opened the buffet door. His eyes popped and his jaw sagged: "Why, I lef' him here just a minute ago."

"Yes, back the train up," Marjorie answered, resolutely, "and go slowly

name—when?"
"He was there just a minute ago

the waiter says."

Marjorie went into instant hysterics, wringing her hands and sobbing: "Oh, my darling, my peor child—stop the train at once!"

She began to pound Mallory's shoulders and shake him frantically shoulders and shake him frantically. He had never seen her this way either. He was getting his education in advance. He tried to caim her with inexpert words: "How can I stop the train? Now, dearle, he was a nice dog, but after all, he was only a dog." She rounded on him like a panther: "Only a dog! He was worth a dozen men like you. You find the conductor at once command him to ston this at once, command him to stop this train—and back up! I don't care if he has to go back ten miles. Run, tell hir at once. Now, you run!" Mallory stared at her as if she had

gone mad, but he set out to run somewere, anywhere. Marjorie paced up and down distractedly, tearing her hair and moaning, "Snoozleums, Snoozleums! My child. My poor child!"
At length her wildly roving eyes noted the bell rope. She stared, pondered, nodded her head, clutched at it, could not reach it, jumped for it several times in vain, then selzed a chair, swung it into place, stood up in it, gripped the rope, and came down on it with all her weight, dropping to the from and jumping up and down in a frenzied dance. In the distance the engine could be heard faintly whist-ling, whistling for every pull.

The engineer, far ahead, could not

magine what unheard-of crisis could bring about such mad signals. The fireman yelled:
"I bet that crazy conductor is at-

tacked with an epilettic fit."

But there was no disputing the command. The engine was reversed, the air brakes set, the sand run out and every effort made to pull the iron horse, as it were, back on its haunches.
The grinding, squealing, joiting,

shook the train like an earthquake. The shricking of the whistle froze the blood like a woman's cry of "Murder!" in the night. The women among the passengers echoed the screems. men turned pale and brace themselves for the shock of collision themselves for the shock of common. Some of them were mumbling prayers. Dr. Temple and Jimmie Weilington, with one idea in their dissimilar sculs, dashed from the smoking room

to go to their wives.

Ashton and Wedgewood, with no one to care for but themselves, seized windows and tried to fight them open. "I don't see a beastly thing ahead,

said Wedgewood, "except the heads of other fools."
"We're slowing down though," said Ashton, "she stops! We're safe Thank God!" And he collapsed into a chair. Wedgewood collapsed into

a chair. Wedgewood collapsed into another, gasping: "Whatevah are we safe from, I wondah?"

The train-crew and various passengers descended and ran alongside the train asking questions. Panic gave way to mystery. Even Dr. Temple came back into the smoking room to finish a precious cigar he had been at work on. He was followed by Little work on. He was followed by Little Jimmie, who had not quite reached his wife when the stopping of the train put an end to his excuse for

chivalry. He was regretfully mun shansh to shave my life's wife-mean my—I don't know what I mean

mean my—I don't know what I mean."
He sank into a chair and ordered a
drink; then suddenly remembered his
yow, and with great heroism, rescinded the order.
Mallory, finding that the train was
checked just before he reached the
conductor, saw that official's bewildered wrath at the stoppage and had
a fearsome intuition that Marjorie
had somehow done the deed. He hurried back to the observation room. ried back to the observation room, where he found her charging up and down, still distraught. He paused at a safe distance and said:

"The train has stopped, my dear.
Somebody rang the bell."
"I guess somebody did!" Marjorie
answered, with a proud toss of the
head. "Where's the conductor?"
"He's looking for the fellow that

"You go tell him to back up—and slowly, too."
"No, thank you!" said Mallory. He was a brave young man, but he was not bearding the conductors of stop-ped expresses. Already the conduc-tor's voice was heard in the smoking

room, where he appeared with the rush and roar of a Bashan bull. "Well!" he beliowed, "which one of yok guys pulled that rope?"
"It was nobody here, sir," Dr. Temple meekly explained. The conductor transfixed him with a baleful giare:

Mallory was about to sacrifice himself to save Marjorie, but she met the conductor's black rage with the withering contempt of a young queen: "I pulled the old rope. Whom did you

The conductor almost dropped with apoplexy at finding himself with nobody to vent his immense rage on, but this pink and white slip. "You!" he gulped, "well, what in— Say, in the name of—why, don't you know it's a penitentiary offense to stop a train

"Isn't it glorious to have our little Snoozleums alive and well?"

But Mallory was feeling like a March day. He answered with a sleety chill: "You care more for the dog than you do for me."

Marjorie's heart stopped at this, but her pride was in arms. She drew herself up, slid the ring from her finger, and held it out as if she scorned it: "With pleasure. Good afternoon, Mr. Mallory."

Mallory took it as if it were the merest trifle, bowed and murmured: "Good afternoon, Miss Newton."

INDIAN GIRLS AS SERVANTS In Arizona They Have Been Found to Be Fairly Skillful and Indus-trious Domestics.

"The best domestic servants that we can get in our isolated region are Indian girls," said Mr. George A. Hurley of Flagstaff, Ariz. "These girls, fairly skillful and moderately industrious, could scarcely be rated ideal, but on the whole, they are satisfactory, and in the absence of other help we are extremely glad to get them. or the batting:
"A man steps to the plate. The ball comes sailing up, white and big, ridiculously easy to hit. The batter must think so, too. We see him hunch his shoulders, draw in his upper lip, act just as men do when they're going to kill it. Then he swings. The impact has the dull sound of a falling plank hitting the sidewalk on one end. High above second base the ball arches, wabbles and bolts in a shining

"Life" 34 Days After Death.

Some years ago Dr. Alexis Carrel, an English scientist, showed that the various organs and tissues taken from a living organism can be maintained in a live state for a more or less prolonged time by placing them in a suitable medium at the right temperature, and that such tissues may even grow for several days. His results have been contradicted by other authors, but more recently Dr. Carrel has achieved even more striking results. By taking the preparations out of their nutritive medium at the right time and nutritive medium at the right time and transferring thme to another medium consisting of three parts of the nor-mal plasma of the animal in question and two parts of water, and repeating the operation at proper intervals up to as many as nine times, he finds that the connective tissue shows great ac-tivity, even as long as thirty-four days, after its removal from the body.

It is a matter of everyday occur-ence for a person to say to his watch-

The sec-ond hand has made 5,258,880 revolutions, and its extremity has traversed on the dial a distance of upwards of 123 miles. The escape wheel has made 52,588,800 revolutions, and as it has 15 teeth, it has come 788,832,000 times in contact with each pallet. The bal-

Among the humbler classes making their purchases at the market, an article which would be worth 75 centimos of a bolivar, or 15 centavos of a "fuerte," will almost invariably be quoted at "a real and a half," or a purchase will be actually paid for by offering 6 bolivars, 62½ centimos in coin, while the seller has stated the value to be "13½ reals."

Not the Same Thing.

This overheard conversation appeals to the weary one as nearly epigrammatic. The young people on the seat ahead of us in the homeward-bound car the other night talked it out so loud that we couldn't help hearing it and jotting down a few notes on it.

"So," said the girl, "he said he knew me when I was a little girl?"

"He didn't say anything of the sort," contradicted the man.

"You said he did."

"I didn't."

"Why! Then what did you say?"

"I said he said he knew you when he was a boy."

That put such a wet blanket on the conversation that we were unable to read our sporting extra uninterrupted for the next several blocks.—Cleveland Plain Dealer.

ARMAGEDDON OF THE SCRIPTURES

Startling Presentation of Coming Events.

PASTOR RUSSELL'S VIEWS.

Civil Powers of Earth Are About to Unite In Common Cause-Powerfu of Armageddon—A Reign of Anarchy Will Be the Result of the Warfard Until The Messiah Takes Control.

Brooklyn, N. Y discourse on the "Battle of Armareddon." His text

(Revelation xvi, 16.) The speaker saild:

Armageddon in the Hebrew signifies

Armageddon in the Hebrew signifies

Armagedon in the Hebrew signifies the "Hill of Megiddo," or Mount of De-struction. It was famous as a battle-field in Old Testament times. The Lord has seen fit to associate the In ten years, which includes two leap years, and consequently a total of 3,652 days, the hour hand has made anything else in the world.

The years, and consequently a total of 3,652 days, the hour hand has made anything else in the world. eveniment. But even in the due time, he Bible assures us, "None of the wicked shall understand" (Daniel zit 9, 10)-none who are out of heart har

mony with God-but only the wise of His people-the "wise virgin" class of the Master's parable. I have long avoided presentation of own judgment, do his own Bible study,

and reach his own conclusions.

Kindly remember that I am not responsible for the figures of speech used by the Lord. My interpretations do in deed constitute a terrible arraigument of institutions which we have all rever enced and which embrace good people of good words and good works. God's saintly people in these various institu-tions, being comparatively few, are ignored when systems as a whole are dealt with in prophecy.

The Dragon, Beast, False Prophet. Our context fells us at three im-pure spirits (teachings) will go forth from the mouths of the Dragon, the

nance of the present order of things.
In giving this interpretation, it is necessary for us to indicate what is necessary for us to indicate what is symbolized by the Dragon, the Heast, and the False Prophet. Bible students of nearly all denominations agree with us that the "Dragon" of Revelation represents the purely Civil Power. Protestant interpreters generally agree that the "Beast like a leopard" (Revelation, xill, 2) represents the Papacy. But fewer still, we fear, will be ready to support our view that Protestantism is the "Image of the Beast" (Revelation xill, 15) in our contest given another

is the "Image of the Benst" (Revelation 211, 15) in our contest given another name, "the False Prophet." We urge so one to accept our interpretation, nor shall we think hard of any who refuse it. We will neither slander nor otherwise injure them now, nor threaten them with eternal torture. They have the same right to their views that I have, and the same right to make them known to others. And I, for one, will be very glad to consider any-thing which opponents may set forth us their interpretations of our text.

"Unclean Spirits Like Frogs." The symbolisms of Scripture, right ly understood, are always forceful. When the Holy Spirit used a "frog" to symbolically represent certain

doctrines or teachings, we may be sure the true application will fit well.

A frog has a sage look, a wise look.
It swells itself up in an apparent endeavor to impress the beholder. Its
great mouth well represents its chief power, used to croak.

Applying these symbols, we that an evil spirit, influence, teaching, will come from the Protestant churches full agreement. The spirit of all will be boastful; an att of superior wisdom and knowledge will be proudly assun-ed-all will croak in harmony. All will tell of dire results that would follow. involving the interests of both the present and the future life, if their counsel be not followed. However con-flicting the creeds, the differences will be ignored in the general proposition that nothing ancient must be disturbed, or looked into, or repudiated.

The Divine authority of the Chur

and the Divine right of kings, asid scriptural claims will be branded as everything rile, at the mouths of these
"frogs" speaking from pulpits and
platforms and through the religious
and secular press. The nobler sentiments of some will be strangled by the phas declared it expedient to commit a crime in violation of justice, human and Divine, to be rid of Jesus and His teachings, so this "frog" spirit will ap-prove of every violation of principle necessary to their self-protection. The croaking of these "frog" spirits or doctrines will gather the kings and princes financial, political, religious

doctrines will gather the kings and princes, financial, political, religious and industrial into one great army. The spirit of fear, inspired by the croakings of these "frogs," will scourge the passions of otherwise good and reasonable men to fury, desperation. In their blind following of these etil spirits, evil doctrines, they will be ready to sacrifice life and everything on the silent of what they mistakenly on the altar of what they mistakenly suppose is justice, truth and righteous-ness, under a Divine arrangement. For a brief time, as we understand

For a brief time, as we understand as Scriptures, these combined forces are Armagedon will triumph. Free beech, free mails, and other liberties hich have come to be the very breath the masses in our day, will be ruthssly shut off under the plea of necesty, the glory of God, the commands the Church, etc. All will seem to be seene, until the great social explosion our context described as the "great arthquake." An "earthquake," in

The Lord Will Gather Them. cture Divine Power will step for-rd, and our text tells us that HE

that God will be represented by the Great Messiah, and that He will be on the side of the masses. Thus we read in Daniel xil, 1: "At that time shall Michael [the Godlike One—Messiah] Michael [the Godlike One-Messiah] stand up"-assume authority. He will take possession of His Kingdom in a manner little looked for by many of those who erroneously have been claiming that they were His Kingdom, and authorized by Him to reign in His name and in His stend. name and in His stend. Jesus declared, "His servants ye are unto whom ye render service." Some

unto whom ye render service." Some may be rendering service to Satan and to error, who claim to be rendering service to God and to rightcousness; and some of these may be serving ig norantly, as did Saul of Tarsus, who "verily thought that he did God a service" in persecuting the Church. The same principle holds true reversely. As an earthly king does not hold him self responsible for the moral character of each soldier who fights in his battles, so the Lord does not vouch for the moral character of all who will enlist and fight on His side of any question and fight on His side of any question "His servants they are to whom they render service," whatever the motive or object prompting them.

The same principles will apply in the coming Battle of Armageddon. God's

Peter t, 10.

The masses will be restless of their The masses will be restless of their restraints, but will be conscious of their own weakness as compared to the kings and princes, financial, religious and political, which will then hold sway. Besides, the masses have no sympathy with anarchy. They realize tridy that the worst form of government is better than none. The masses will seek relief through the ballot and peaceful re-adjustment of earth's affairs for the elimination of evil, for the placing of monopolies and utilities

and the supplies of nature in the hands of the people for the public good. The crisis will be reached when the hither-to upholders of law shall become vio-lators of the law and resisters of the will of the majority as expressed by the ballot. Fear for the future will lead the well-meaning masses to desper-ation; and anarchy will result when

Socialism falls. The Cloud's Silver Lining.

Horrible would be this outlook for the future did we not have the infalli-ble Word of God assuring us of a glorious outcome! Divine Wisdom has withheld until our day the great knowledge and skill which is at the same time breeding millionaires and discontents. Had God lifted the vell a thoutenis. Had God lifted the vell a thou-sand years sooner, the world would have lined up for its Armageddon a thousand years sooner. But that would have been too soon for the Di-vine purpose, because Messiah's King-dom is to be the great Thousand-Year-Sabbath of the world's history. God in kindness velled our eyes until the time when the gathering to Ar-mageddon would immediately precede Messiah's taking to Himself His great Messiah's taking to Himself His great power, and beginning His reign.—Reve-lation xi, 17, 18.

"Send Them Strong Delusions."

that the Church has been reigning on the carth as His representative. On the strength of this delusion, Jews and heretics have been persecuted to death as opponents to Christ's Kingdom. All the while we thoughtlessly repeated the Lord's prayer: "Thy Kingdom come; Thy will be done on earth, as in Heaven." We knew that the Redeemer said that He would come again to make us His Bride and joint-heirz; but we ignored the Scriptures. We were drunk, as the Scriptures we were drunk, as the Scriptures symbolically say, "all nations were drunk" with the false doctrine. It is this false doctrine that will constitute the "frog" spirit which soon will begin to croak and to prepare for Armageddon.

The Bible presentation is that the world is a section of the universe in rebellion against Divine authority, under the captualny of Satan and his as-

rifice must, eventually, grant Adam and his posterity a full, fair opportunity for the attainment of everlasting life. All who thus see the Divine program and are walking in the light may know

Armageddon Not Yet but Soon.
For forty years the Armageddon forces have been mustering for both sides of the conflict. Strikes, lockouts and riots, great and small, have been merely incidental skirmishes as the beiligerent parties crossed each other's paths. Court and Army scandals in Europe, Insurance, Trust and Court scandals in America, have shaken public confidence. Dynamite plots, charglle confidence. Dynamite plots, charg-ed by turns on employees and on em-

ployers, have further shaken confidence and tended to make each distrustful of the other. Bitter and angry feelings on both sides are more and more manifest. The lines of battle are daily becoming more distinctly marked. Nevertheless Armageddon cannot yet be fought. Other matters intervene, according to prophecy.

Gentile times have still two years to run. The "Image of the Beast" of our context must yet receive life-power. The Image must be transformed from a mere mechanism to a living force. Protestant Federation realizes that its organization will still be futile unless it receive vitalization—unless its clergy

t receive vitalization-un directly or indirectly shall be recog-nized as possessed of apostolic ordina-tion and authority to teach. This the prophery indicates will come from the two horned beast, which, we believe, symbolically represents the Church of England. High-handed activities of Protestantism and Catholicism, operat-Protestantism and Catholicism, operating in conjunction for the suppression of human liberties, await this vivifying of the Image. This may come soon, but Armageddon cannot precede it, but must follow—perhaps a year after it, according to our view of the Prophecy. Still another thing intervenes: Although the Jews are gradually flowing into Palestine, gradually obtaining control of the land of Canaan, and although reports say that already nineteen millionaires are there, nevertheless prophecy requires an evidently, larger number of wealthy Hebrews to be there before the Armageddon crisis be reached: Indeed we understand that "Jacob's trouble" in the Holy Land will come at the very close of coming Battle of Armageddon. God's side of that battle will be the people's side, and the very nondescript host, the people, will be plitted at the beginning of the battle. Anarchists, Socialists, and hot-headed radicals of every school of reason and unreason, will be in the forefront of that battle. The majority of the poor and the middle class prefer peace at almost any price. A comparatively small number, God's consecrated people, will at heart be longing for Messiah's Kingdom, These will bide the Lord's time and wait patiently for it; they will be of good courage, knowing the outcome outlined in the "more sure word of prophecy," to which they have done well to take heed, "as unto a light shining in a dark place until the Day dawn."—II Peter I, 19.

The masses will be restless of their

Speech Strangely Restored.

While attending a picture show in Melbourne, Victoria, recently, his speech and hearing began to return to a young man who, during the previous harvest season, had lost both these faculties through fear. While engaged in harvesting operations in the Hor-sham district, he trod on a big black snake, which immediately self around his leg. He was not bitten by the reptile, but was nevertheless greatly alarmed, so much so that he went into a fit, under the influence of which he remained for some time, and then lost the powers of speech and hearing. The scenes depicted at the picture show were of a thrilling char-acter, and on the following day he could utter a few words. Subsequent-

doubt, says the Medical Record, whether the sum total of diseases is any less than it was before the medical profession reached its present high standing. Preventive medicine has made "little headway," and "in the opinion of some medical men diseases are on the increase." In the deeper recesses of our consciousness we had suspected something of the kind ourselves, but such heterodoxy on the part of a layman would have exposed him to excommunication with bell, book, and candle, or at least with bacteria, serums, and antitorins. But with the Medical Record behind us we see a saford to creep out into the open.

Many Scandinavians have a decidedly different anatomical construction from less hyperborean people. In these hardy northmen the layer of fat under the skin, panniculus adipofat under the skin, panniculus adiposus, is somewhat seal-like and blubbery, something like in those cold sea
animals, the whale, seal and walrus.
Also the blood vessels in this fat are
somewhat overdeveloped as in sea
mammals. All this comes about from
exposure to the severities of disease
and climate. It is no unusual thing
for Norwegians and Swedes to stay
in icy cold water for hours hunting

DISPELLED DREAM OF WEALTH Danish Woman Finally Convinced as to the Value of Note Peculiarly

The woman handed her friend a \$5 bill. "See the number of small fives engraved on it?" she asked. "When I was in Denmark a few years ago such a bill as that caused me a great deal of amusement, and I had to sur-render one before I could prove myself clear of a false belief regarding my nances. An aunt whom I was visit ing saw in my purse one day a num-ber of these bills, and she asked to examine one, as it was so different from any of the Danish money. She tudied it attentively a few minutes and then asked me how much it was and then asked me how much it was. I told her it was \$5, and, to my surprise, I saw she did not believe mc. If it is only that amount, she said, why has it so many little figures on it? I tried to explain, but I made little impression on her. Later I heard she had told our relatives that I was 'worth thousands and thousands of dolworth mousands and nousands of dollars and was trying to conceal the fact from the family lest they should expect some things of me that they would not otherwise. When I heard that I was visiting in another part of the country and could not very well defend myself, so I hit on the expe-dient of sending my aunt a present of a \$5 bill. When she went to have it changed into the money of the country she was at last convinced, though a the price of having her wealth rudely shattered."

QUEER CASE OF SMUGGLING CAT MUST NOT BE STRUCK

Stolen Partridge Eggs Brought Into Vienna by Means of a Dummy Baby. A singular case of smuggling by means of a dummy baby was brought to light by the city customs officials at the Northwestern station recently.

Other Method of Punishment Is Re-

led by an Authority on the Subject.

It isn't a very nice task to punish

le light by the city customs omcans at the Northwestern station recently. Partridge eggs have for long past been extensively stolen from preserved states in Hungary, smuggled into Visnna and sold to poultry dealers, who hatched the eggs in incubators, brought ap the birds by hand, and sold them below the prices asked by more honest dealers. A special lookout for smugglers has resulted in the arrest of two peasant women.

Arriving in Vienna in the national Blavonian costume, each of them carried a baby, tied according to the interariable national custom, to a cushion, and so closely "packed" that only the lace was visible. The women were soticed to be a little agitated as they passed the customs, and they were followed home. It was then discovered that while one baby was a living child, the other was a dummy. It consisted of a wax head, partly hidden by a shawl and a cap, while the cushion was filled with more than 600 partridge eggs.—Vienna Correspondence London Daily Mall. tised. This is how to do it, according to Louis Wain, the great authority on the fascinating feline.

In the first place, don't actually strike the cat. A blow merely numbs it. And when the spine, which is its most sensitive part, is struck—particularly if the cat is old—it is likely to spring at the striker.

When pussy does anything wrong, frighten the wrongdoer by striking a stick in the ground. A cat is most sensitive to sounds, and will connect this new noise with what it has done. It feels more intensely than most animals; hence its supposed savagery is eases. Cats are highly electrical, and it is very good to have one perch on one's shoulder or knees.

CHAPTER XXVIII.

The Woman-Hater's Relapse. The observation room was as lone as a deserted battlefield and Marjorie as doleful as a wounded sol-dier left behind, and perishing of thirst, when the conductor came back with Snoozleums in his arms.

He regarded with contemptuous event as the stopping of the Trans-American. He expected to see Marjorie receive the returned prodigat with wild rapture, but she didn't even smile when he said: "Here's your powder-pun."

It was like offering the kalser a new job, but the conductor swalldwed the insult and sought to repay it with

irony. "Thanks. And if you ever want to

run this road for a couple of weeks, just let me know." Marjorie nodded appreciatively and Marjorie nodded appreciatively and said: "I will. You're very kind."
And that completed the rout of that conductor. He retired in disorder, leaving Marjorie to fondle Shoozie-ums with a neglectful indifference that would have greatly flattered Mallory, if he could have seen through the partition that divided them.
But he was witnessing with the

cynical superiority of an aged and disillusioned man the, to him, childish benavior of Ira Lathrop, an eleventh-

For just as Mallory moped into the smoking-room at one door, Ira Lath-rop swept in at the other, his face rubicund with embarrassment and ecstasy. He had donned an old frock cont with creases like ruts from long exile in his trunk. But he was feel-ing like an heir apparent; and he startled everybody by his jovial hall: "Well, boys-er-gentlemen — the drinks are on me. Waiter, take the

"Don't do anything desperate, gen themen," he said, with a look of di-vine philanthropy. "The bar's closed, but Little Jimmie Weilington is here with the life preserver." From his hip-pocket he produced a silver flask that looked to be big enough to carry a regiment through the Alps. It was greeted with a salvo, and Lathrop greeted with a sait, and thought—said to Jimmie: "I apologize for everything I have said—and thought—about you." He turned to the porter: "There ain't any law against giving this way, is there?"

The poor old clergyman, too deeply invoived in his deception to brave confession now, decided to do and dare all. He stammered, "Er—ah certainly," and held out his hand for his share of the poison. Little Jim-mie winked at the others and almost filled the glass. The innocent doctor bowed his thanks. When the porter reached him and prepared to fill the remainder of the glass from the siphon, the parson waved him aside with a misguided caution:
"No, thanks. I'll not mix them."
Mallory turned away with a sigh:

"He takes his straight. He's no par

with surprising cynicism. "Where do you get the parson?"

"Hang the parson," Wedgewood repeated, "Who's the gel?"

"I'll bet I know who she is," Ashton interposed; "it's that nectarine of a damsel who got on at Green River,"

"Not the same!" Lathrop roared. "I found my bride blooming here all the while. Girl I used to spark back in Brattleboro, Vt. I've been vowing for years that I'd live and die an old maid. I've kept my head out of the soose all this time—till I strock this train and met up with Anne. We got to talking over old times—waking up old seatiments. She got on my nerves. I got on hers. Pically I said, 'Aw,

neil, let's get married. Save price one stateroom to China anyway.' She says, 'Damned if I don't!'—or words to that effect."

to that effect."

Mallory broke in with feverish interest: "But you said you were going to get married on this train."

"Nothing easter. Here's how!" and he raised his glass, but Mallory hauled it down to demand: "How? that's what I want to know. How are you sains to set married on this passon.

"Well, you see, when I used to court Anne I had a rival—Charlie Selby his name was. I thought he cut me out, but he became a clergyman in Utah—Oh, Charlie! I telegraphed explained: in Utah—Oh, Charlie! I telegraphed him that I was passing through Ogden, and would be come down to the train and marry me to a charming lady. He always wanted to marry Anne. I thought it would be a durned good joke to let him marry her—to me."

"D-did he accept?" Mallory asked,

"D-did he accept?" Mallory asked, excitedly, "is he coming?"
"He is—he did—here's his telegram," said Ira. "He brings the license and the ring." He passed it over, and as Mallory read it a look of hope spread across his face. But Ira was saying: "We're going to have the wedding obsequies right here in this car. You're all invited. Will you come?"

There was a general yell of acceptance and Ashton began to sing, "There Was I Waiting at the Church" Then he led a sort of Indian war-dance round the next victim of the matrimonial stake. At the end of the hullaballoo all the men charged their glasses, and drained them with an up-

roarious "How!"

Poor Dr. Temple had taken kuxuriroor Dr. rempe had taken surr-ous delight in the success of his dis-guise and in the prospect of watch-ing some other clergyman working while he rested. Ho joined the dance as gaily, if not as gracefully, as any of the rest, and in a final triumph of

ecklessness, he tossed off a bumper of straight whisky. Instantly his "How!" changed to "Wow!" and then his throat clamped fast with a terrific spasm that flung the tears from his eyes. He bent and writhed in a slient paroxysm till he was pounded and shaken back to life and water poured down his throat to

eopen a passage.

The others thought he had merely choked and made no comment other than sympathy. They could not have dreamed that the old "physician" was as ignorant of the taste as of the

igor of pure spirits. After a riot of handshaking and good wishes, Ira was permitted to es-cape with his life. Mallory followed

him to the vestibule, when he caught him by the sleeve with an anxious: "Excuse me."

"Excuse me."
"Well, my boy—"

"May you—what? Why do you

"Tq get married."

"Then what do you want with an

"You don't understand."
"My boy, one of us is disgracefully drunk. "Well, I'm not." said Mallory, and then after a fierce inner debate, he decided to take Lathrop into his con-fidence. The words came hard after so long a duplicity, but at last they

"Mr. Lathrop, I'm not really married to my wife."

"You young sequndrel!"

But his fury changed to pity when
he heard the history of Mallory's illfated efforts, and he promised not
only to lend Mallory his minister at
second-hand, but also to keep the whole affair a secret, for Mallory ex-plained his intention of having his own ceremony in the baggage-car, or somewhere out of sight of the other

passengers. Mallory's face was now the cold embers of hope le the cold embers of hope leaped into sudden blaze. He wrung Lathrop's hand, saying: "Lord love you, you've

saved my life—wife—both."

Then he turned and ran to Mar jorie with the good news. He had quite forgotten their epoch-making separation. And she was so giad to see him smiling at her again that she forgot it, too. He came tearing into he observation room and took her by he shoulders, whispering: "Oh, Mar-orie, Marjorie, I've got him! I've got

"No! I can't believe it! Where is he?" She began to dance with de-light, but she stopped when he ex-

plained:
"Well, I haven't got him yet, but I'm going to get one."
"What—again?" she groaned, weary of this old bunco game of hope.
"It's a real live one this time," Mallory insisted. "Mr. Lathrop has ordered a minister and he's going to lend him to me as soon as he's through with him, and we'll be married on this train." ded on this train."

Marjorte was overwhelmed, but she felt it becoming in her to be a triffe coy. So she pouted: "But you won't want me for a bride now. I'm such

"I skauidn't be surprised."
"The poor dears! I'd better write
them a telegram at once."
"An excellent idea."
She ran to the desk, found blank

forms and then paused with knitted brow: "It will be very hard to say all I've got to say in ten words."

"You shall never have cause for ealousy, my own."
But fate was not finished with the Philiation of the unfortunate pair, and already new trouble was strolling in their direction.

CHAPTER XXIX.

Jealousy Comes Aboard. Jealousy Comes Aboard.
There was an air of domestic peace
in the observation room, where Mailory and Marjorie had been left to
themselves for some time. But the
peace was like the ominous hush that

pence was like the ominous hush that precedes a tempest.

Mallory was so happy with everything coming his way, that he was even making up with Snoozleums, stroking the tatted coat with one hand and holding up his newspaper with the other. He did not know all that was coming his way. The blissful silence was broken first by Marjorie:

"How do you spell Utah?—with a 77"

"Utah begins with You," he saidand rather liked his wit, listened for some recognition, and rose to get it, but she waved him away.

"Don't bother me, honey. Can't you see I'm busy?"

He kissed her hair and sauntered back, dividing his attention between Spoorleums and the ten-inning game. And now there was a small commo-tion in the smoking room. Through the glass along the corridor the men caught sight of the girl who had got

on at Green River. Ashton saw her first and she saw him.
"There she goes," Ashton hissed to the others, "look quick! There's the "My word! She's a little bit of al

Even Dr. Temple stared at her with approval: "Dear little thing, isn't The girl, very consciously uncon

scious of the admiration, moved de-murely along, with eyes downcast, but at such an angle that she could take in the sensation she was creating; she went along picking up stares as it they were bouquets.
Her demeanor was a remarkable compromise between outrageous fiirtation and perfect respectability. But she was looking back so intently that

when she moved into the observation room she walked right into the news paper Mallory was holding out before Both said: "I beg your pardon." When Mallory lowered the paper both stared till their eyes almos

popped. Her amazement was one of immediate rapture. He looked as i he would have been much obliged for a volcanic crater to sink into. "Harry!" she gasped, and let fall her handbag.

"Kitty!" he gasped, and let fall his newspaper. Both bent, he handed her the newspaper and tossed the handbag into a chair; saw his mistake, withdrew the newspaper and

"Don't ever do that. You beautiful in brass buttons."
"Thanks."
"Harry!"

What's the matter now?

"This tie, this green tie, isn't this the one I knitted you?"
"I am sure I don't know, I bor-rowed it from the conductor."
"Don't you remember? I did knit

"Don't you remember? I did knit you one."
"Did you? I believe you did! I think I wore it out."
"Oh, you fickle boy. But see what I have. What's this?" He stared through the glassy eyes of complete helplessness. "It looks like a bracelet."
"Don't tell me you don't romember this!—the little bangle bracelet you

gave me."
"D-did I give you a baygled brang-let?"
"Of course you did. And the in-

"Of course you did. And the inscription. Don't you remember it?"

She held her wrist in front of his aching eyes and he perused as if it were his own epitaph, what she read aloud for him. "From Harry to Kitty, tha Only Girl I Ever Loved."

"Good night!" he sighed to himself, and began to mop his brow with

"You put it on my arm," said Kath-"Always?"

"Always! no matter whom I was engaged to."

The desperate wretch, who had not dared even to glance in Marjorie's di dared even to giance in marjories di-rection, somehow thought he saw a straw of self-defense. "You were en-gaged to three or four others when I was at West Point."

"I may have been engaged to the

"You got me at last."
Kathleen fenced back at this:

"Oh, no! My heart has only known one real love." He threw this over her head at Marjorie, but Kathleen selzed it, to his greater confusion:
"Oh, Harry, how sweet of you to say
it. It makes me feel positively faint," and she swooned his way, but he shoved a chair forward and let her shoved a cealr forward and let her collapse into that. Thinking and hop-ing that she was unconscious, he made ready to escape, but she caught him by the coat, and moaned: "Where

am I?" and he growled back:
"In the Observation Car!"
Kathleen's life and onthusiasm returned without delay: "Fancy meeting you again! I could just scream."

"So could I."
"You must come up in our car and ee mamma." "Is Ma-mamma with you?" Maipecility.

"Oh, yes, indeed, we're going "Don't let me detain you."
"Papa is going round the

"Awfully kind of her."

"You must come and see her—sho's some stouter now!"
"Oh, is she? Well, that's good." Mallory was too angry to be sane, and too helpless to take advantage of his anger. He wondered how he could ever have cared for this molasses and mucliage girl. He remembered now that she had always had these same cloying ways. She had always pawed him and, like everybody but the pawers, he hated pawing. It would have been bad enough at

Ira, seeing Mailory, edged close and whispered: "Stand by to catch the minister on the rebound."

But Mailory turned away. What use had he now for ministers? His Harry, dear?"

The porter came flying in with two large bowls of rice, and shouting, "Here comes the 'possum—er—posson," Seeing Marjoric, he caid: "Shall I perambulate Mista Snoozleon the same boat."

The first sincere smile he had experienced came to him: "I go on an army transport, fortu—unfortunately."

"I'm afraid it couldn't be arranged."

Because it was a moonlit summer evening and they were young, happy and courageous, they bore the infliction of Billy's music without throwing things at him. They liked Billy so much that even his joyous rendition of "Juanita" in a sweet but hardly accurate tenor voice to the twang of his guilar was received with patterns. his guitar was received with patience, albeit neither man nor girl on the wide, cushion-strewn veranda ceased talking or laughing or firting. They knew Billy would not expect that even

ing him, Billy, and being ceaselessly with the other man. She knew, too, that Norma and Strafford were lovers, if not actually engaged. That made her behavior worse.

Then, to relieve his own pain, and add to that of those who had to listen, he sang "The Spanish Cavaller," and then "In Old Madrid," and then "Juanita" over again. He knew only the three songs, which was fortunate, for had he known another he would have rendered that also. As would have rendered that also. As it was, he finally put down the long-suffering instrument and tried to talk

most malicious tascinations of Stella the moment she tried them on him. Billy was a comfort, and she told him so. They went back to the others.

The next few weeks saw a queer change in the affairs of the dozen young people, most of them out at Billy's summer home for a couple of months. Billy and Norma were al-

months. Billy and Norma were al-ways together, inseparable.

As Strafford saw Norma so obliv-ious of him, he began to think of her more and more, wondering if Stella was, after all, the one girl for him? One morning he asked Norma for a walk, but she told him sweetly enough that she was golfing with Billy that day. No, she wouldn't go out on the lake in the evening—Billy wanted her

to learn a new song.

Behind them stood Stella, a queer look on her piquant, brown little face.

Sauntering off to the garden, she munaged to run against Billy—she was knew Billy would not expect that even from guests.

Billy looked out on the little lake to a boat that drifted in the white path made by the moon on the water, and wondered what James Strafford

he had begged her to do so not very, long before. Neither did he like the light tone about Norma. He made some excuse and sulked away by himself with his pipe.

Out on the links Billy and Norma golfed and laughed. They had sought comfort and had found it.

It was the evening that followed that Stella made a discovery. Billy and Norma had walked out on the moonlit beach and sat together on the sand watching a stiff breeze send the waves lapping up at the shore line.

Billy put his arm over Norma's shoulder with a loving little movement.

A light laugh made them both start,

A light laugh made them both start, A light laugh made them both start, but instinctively Billy kept his arm where it was. They looked up and saw Stella and Strafford, the latter walking unwillingly as though he wished he were elsewhere. Stella aughed again.
"What a charming little scene! I

hope we do not interrupt? Is it real-or just improvised, Romeo?" She addressed Billy and was answered by "Norma and I are real people—we

don't improvise on a theme like—love. It's real. Isn't it, Norma!"

She nodded. Suddenly she knew that she and Billy loved each other deeply and sweetly, and that these other people and their little jealousies and weaknesses meant nothing to either of them. But there was still

either of them. But there was still enough feminine malice in the girl to make her ask sweetly of Stella:

"And you? Am I to wish you—"
"Strafford broke in rather angrily:
"Don't be absurd! Stella doesn't enjoy that any more than—I do, and you know it! Won't you and Billy, you know it! Won't you and Billy, come back to the house with us?"
Having put himself on record, Strafford knew Stella would expect, no more of him. What did she desorve? He told himself that everything was her fault. Hang girls, anyhow! He made for the smoking room and his worst old nine at the first year. and his worst old pipe at the first pos-sible moment. He leaned back and blew rings, and tried not to see Norma as a bride. That was a little too much for Strafford at that time.

Plants have a mind of their own on the subject of winter sleep, and gardeners have tried various methods of waking them up prematurely, to furnish blossoms at a time when they are scarce and costly. Mere green house heat and moisture failing to yield the desired results, they have successfully tried warm baths and ether vapors to shorten the hibernating period of bulbs. From Germany comes a description of the latest plan devised by a man named Weber. By sticking a needle into the base of a bud he has caused it to usfold two or three weeks ahead of its fellows. Still more time was gained by injecting water into the buds. Not content with water, a physician has tried injections of water with 10 per cent. of alcohol By this means he succeeded in gaining ten days in the budding of oak twigs.

Seemed to take it as a matter of course. He led the way noiselessly up the cavernous stairs to a room, where he paused. The door was again open, a din, filckering light throwing shadows that wavered above a heavy screen. My companion motioned me to story. I waited while he went for ward and disappeared behind the screen. A few moments passed. Then he appeared again and beckoned to me.

"I feared it," he remarked, coolly. "He needs no more of these cold meals."

Indeed, he did not. I found myself looking at a man lying with upturned face, stone dead—a sight of horror. His hair was a foot long, and his beard, clotted red, covered his shirt. "We must bury him," said the inneeds in the budding of oak twings.

It never occurred to me to seek an expression of whis resulting to the days in the budding of oak twings.

The old hall lay desolate-pitilessly deserted by man, woman and child. I had heard of it, for the story was known, but the sight of the demesno—the drives obliterated, the lawns a jungle and the park empty of cow or sheep—led me to pull up the car and contemplate the wilderness that lay beyond the mouldering gates and the

curtainless lodge.

This then, was the Manor House that Hughenstein, of Philadelphia, bought for his bride, just before they salled on that last tragic voyage on the Cosmic, in which both had per-ished. No wonder that young Brook-lyn, his stepson—for Mrs. Hughenstein vas a widow when the millionairo married her—shuddered at residence therein. A haunted house for him, if

"With the lawyers," he explained. "All the tenants round here—indeed, I myself—have full rent returned, cash for cash, so long as the manor house is undisturbed."

I had no thought of adventures when I put my boots outside the door a couple of hours later. The impulse which led we had been thoroughly diffied in the prayer, so that no trouble was anticipated on that score.

On the particular Sunday of Roscoe's first and only visit, the prayer had roached the clause, "Clive use his day our daily bread," when, during the pause which followed, little Roscoe, to the distress of Richard and the consternation of the class, added in a shrill treble, "And a little gravy!"

A year ago the International Bible Students Association sent a Committee of Seven to investigate missionary prospects in foreign lauds—especially in South India, where it is making special effort. I was one of that Committee, otherwise composed of four successful business men, one doctor, and General Hall, of the U. S. A. The Committee made its report to one of and General Hall, of the U. S. A. The Committee made its report to one of the largest Christian gatherings ever held in New York City—in the Hippodrome—on March 31st. Its Report, published in pamphlet form, reached a wide circulation amongst Christian people. I am authorized to offer free, until the supply is exhausted, one copy each to all interested in Foreign Missions. Send postcards addressed to "I. B. S. A., Brooklyn, N. X.," requesting a copy of the Missionary Report. The Committee, in preparing this Report, laid bare the facts as gently "Wouldn't that frost you!" exclaimed young Borgus after they had proceeded a safe distance. "Just wanted to find out what we were talking about! Catch her sitting out there by herself! We'll circle the block and see!" When they got near enough again to see the steps young Borgus gave a low gurgle of triumph. The steps were empty.
"Come on," he said. "Let's go get some ice cream. Just as sure as we

Foreign Mission work taught by the Scriptures generally is wholly differ-ent from that which has been attemptent from that which has been attempted during the past century, under the Postmillennial theory—that the Church is to conquer the world for Christ and to bring about a thousand yeas" reign of righteousness, after which Christ's Second Adrent will come, and those blessed conditions obliterated by the burning up of the world. This theory, set forth in nearly all of our creeds, is supplemented by the theory that all dring in ignorance of Christ and outside of saintship, are passing to an eternity of torture.

side of saintship, are passing to an eternity of torture.

This Franzied view, misnamed Gospel, has been presented to the heathen with little appreciable effect, just as in civilized lands. The whole theory is wrong. What the whole world needs is the True Bible Message, stripped of all the ignorance of the Dark Ages.

The Bible teaches the Premillennial Coming of Christ—that the Second Coming of Little, that the Second Coming of Jesus must take place before His Kingdom is established in power and great glory and Sztan. power and great glory and Satan bound. The dead will come forth. The rising Sun of Righteousness will cause the knowledge of God to fill the earth, dissolving the mists of bigotry and

An investigator, given to the collection of curious daia, has observed that there are at least three different tones emitted by insects; a low one during flight, a higher one when the wings are held in such manner that they do not virbrate, and a yet higher tone when the insect is held so that none of its limbs can be moved. This last, it is pointed out, is the "voice proper" of the insect. In some cases it is produced by the stigmata of the thorax.

home as well as in business is econ only of time and labor as well as economy of money, and for the up-to date home, kitchen furniture must be wholly practical—free from useless features. Take for example the kitchen range.

Manufacturers for years vied with each other in covering their product with rosettes and filigree in the fancied belief that a showy range would please the housewife best.

But what a mistake! Ask any housekeeper to day and she will say "The kitchen is the chief werk-room in our home, its fixtures should be neat, plain and sanitary. The cook

y "The kitchen is the chief werk-room in our home, its fixtures should be neat, plain and sanitary. The cook ing range should be in keeping with this idea—outside finish smooth and plain. Yeu knew a SMGOTH casting is always easy to clean."

To the makers of the Glenwood Range should be given chief credit for the modern plain range. It is in their modeling departments and pattern shops that the graceful, pleasing lines of the present-day sital range have been carefully worked out.

But remember—it is one thing to make a plain sange and quite another to make it smooth. A plain casting shows all imperfections. If the iron is poor or the workman careless, the finish will be coarse and rough, not fine and smooth like a Glenwood. For right here is where Glenwoods excel—they are smooth as well as plain. Glenwood Ranges are made in hundreds of different patterns and sizer to suit all purses. It matters not whether your kitchen is large or small there's a Plain Glenwood made to fit it. They can be had for burning coal, a wood or gas with powerful Hot Water Fronts for heating the kitchen boiler or fer country ups with large copper reservoir on the end opposite fire box.

They are fully guaranteed by the makers to give the asyrice and a single and a single copper reservoir on the send opposite fire box.

Keith's Theatre! The strength and versatility of a ligh-class vaudeville entertainment was never better demonstrated than in the bill of attractions offered at Ceith's Theatre for the week of Nowember 18th. It is full of life and jolity from the rise to the fall of the urtain, with some surprises quite exraordinary on a variety program. For most among these is the first appearance here of the manager of the New York Giants, John J. Mc-Iraw, known far and wide as "the little Napoleon of the diamond. He alls his menologue "inside Baseball," und certain it is that "the little Napoleon" knows as much and more of this subject than perhaps any other wise one of the craft. As this is distinctly a "fan' town, and Mr. McGraw has a multitude of friends here, he is sure of a fine reception on the part of his ardent admirers.

Mr. Julius Steger is a name to conjure with in vaudeville. In "The Fifth Commandment" and other soulgripping plays, this romantic actor and singer has endeared himself to the vaudeville world, and now he comes with his masterpiace pre-eminent—a play of convict life, entitled, "Justice," from the pen of Edgar James.

When it comes to artistic pantomme, the Parisians have the warle to themselves. This is demonstrated in the first production here of a Freach wordless playlet, entitled, "The Apple of Paris," with twenty pantomimic artists in the cast, including the continentally celebrated dancer and partonimist, Mile. Minni Amato. The production is staged by Signer Aurelio Coccia, of La Essia, Milan, and avery one of the three scenes is an artistic gem. strength and versatility of

Approves of Modern Dress.

Many severe things have been said of the inautistic qualities of man's dress in modern times, so that it comes as a pleasing surprise to hear a word spoken in its defense by no less an authority than Antonio de la Gandara, the pertrait painter. "In the first place," he says "people dress very well in these days. Thus, as regards the men, think of their evening dress clothes! Admire the sober lines, the perfect harmony! One daspilling point alone in the whole cost time, the white surface of the shirt front all else is black, nothing but man. Do you know anything but me. Do you know anything more beautiful? Never, possibly, has man's dress been nobler. In a century's time, it will be said, with what perfect art men of that time used to dress."

Mallory rejoiced to see that the hurricane of Marjorie's jealousy had only whipped up the surface of her soul. The great depths were still calm and unmoved, and her love for him was in and of the depths.

"I don't know. She's been there forever. I'm sure it's that cat of a Mrs. Whitcomb."

"Good morning, Mrs. Mallory," snapped Mrs. Whitcomb.

Mrs. Wellington was rather proud that the random shot landed, but Marjorie felt most uneasy between the two tigresses: "Good morning, Mrs. Whitcomb," she said. There was a disagreeable silence, broken finally by drinking—have you been swearing, yet?"

"Not yet," the old cregyman smiled,
"Tve been saving that up for a good occasion. Perhaps it will rise before the day's over."

And his wife choked on her tea at the wonderful train-change that had come over the best man in Ypslianti.
By this time Fosdick had reached the stateroom from which he had been banished again at the Nevada state-line. He knocked cautiously.
From within came an anxious voice: "Who's there?"

The gallantry of the ante-bellum South was as famous as the ante-bellum hospitality. The one cost nothing of time as the other cost nothing in effort. While people have been struggling and bumping and shoving in "I." and subway trains in New York, the people who rode in the crosstown horse cars—relics of an easier decade—have been practicing a politeness which, by contrast with the boorishness so painfully evident elsewhere, was touching and exquisite. The patrons of the horse cars were those with time to spare.

The rush of modern American life is into an excuse for bad manners. But it is an explanation. We cannot preach it seems of the without forcing the economies in other things—and among these are thoughtfulness and consideration.

WHEN SPRING

CAME

By JEANNE O. LOIZEAUX

(Copyright, 1912, by Associated Literary Press.)

It came tardily, with a sudden burst, after long rigid cold, a winter of discontent, the drearlest in William Falling's young life. From the past October when he had ceased to be, so far as Betty was concerned, he had simply set his teeth and endured things, grinding out routine work in the office as though flends pursued. For the rest, he ate and slept—when he could. He knew work was his only salvation, though he had now nothing to make money for. Betty was not solved. The complete the could have been the could. He knew work was his only salvation, though he had now nothing to make money for. Betty was not solved. For make the could have been the could. He knew work was his only salvation, though he had now nothing to make money for. Betty was not solved to see the could. He knew work was his only salvation, though he had now nothing to make money for. Betty was not solved to see the could have been through?

In the eyes were wide with utter astonishment. "As the susing your hands—you don't allow things of that sort for nothing—"Her look stopped him. Light had come to her. And the man saw wary with both hands.

"You—saw that? I—he made me refuse him again. I had just told him there was somebody else. I didn't let him take my hands—he just did it. That was the instant you chose to see! If you had waited! And then—never to come near me again, or send me a word!" She put her arm up over her face with the gesture of a child.

"Oh," he said, sheltering her in his arms. "If you knew what I have been through?" She put her arm up over her face with the gesture of a child.

"Oh," he said, sheltering her in his arms. "If you knew what I have been through the could have the provided him when he could have the provided had the provided had come to her. And the man saw him—kissing your hands—you don't allow things of that sort for her look to her. And the man had come to her. And the man had come to her. And the man had come to her. And the man "All right, Irn," said Anne, giad to be meek; "come along," and she rose. Ira hesitated. "Still, if you'd rather, we'll eat here." He sat down.
"Oh, not at all," said Anne; "we'll go where you want to go."

"But I want to do what you want to do."
"Go do to the said Anne and sept—when he could. He knew work was his only salvation, though he had now nothing to make money for. Betty was not going to marry him. Washburn had won out with her.

"Oh, not at all," said Anne; "we'll go where you want to go."

"But I want to do what you want to do."

"So do I—we'll go," said Anne.

"We'll stay."

"No, I insist on the dining-car."

"Oh, all right, have your own way," said Ira, as if he were being builled, and liked it. Anne smiled at the contrariness of men, and Ira smiled at the contrariness of men, and lead at the contrariness of men, and when they reached the véstibule they kissed each other in mutual forgiveness.

As Wedgewood stropped an old-fash-loned razor, he said to Ashton, who was putting up his safety equipment:
"I say, old party, are those safety razors safe? Can't you really cut yourself?"

"Cut everything but hair," said Ash
"we'll stay."

Not that she had ever promised to marry failing. In fact he had not asked her. The word love had not asked her. The word law had been so happily confident the whole beautiful summer and autumn that she cared just as he did. They had been inseparable to such as extent that Jerry Washburn had apparently given up his long pursuit of the girl and had gone "back east." Wash burn had money, and ability, too.

Now Failing cursed himself for not having made sure of the girl in words. He had not spoken because he was working so desperately to be made justion partner in his business, so that he might have something definite to offer her.

"Cut everything but hair," said Ashton, put out his hand: "Would you be kind enough to lend me your razor again this morning?"

"Sure thing," said Ashton. "You'll find your blade in the box there."

Mailory then negotiated the loan of one more fresh shirt from the Englishman, and a clean collar from Ashton. He rejoiced that the end of the day would bring him in touch with his own baggage. Four days of foraging on the country was enough for this soldier.

And never through a long life would he forget the heart-sickness of the rest. Down the street he had swung all radiant with joy, and turning a corner had almost run over little Evic Cross, Betty's house guest, for whom he had never cared much. Her big eyes were almost feverishly bright, but her cheeks were pale and she was manifestly excited. To pass time he turned and walked with her a little.

Every one nowadays recognizes the absurdity of idleness. For what could be more ridiculous than the idle wom-an who can find no one to idle with

One morning he deliberately left the office and set off for a walk. He walked miles. First he avoided Betty's house, and then came back and made himself pass it. The sun was hot, and little leaves, like a green mist, were beginning to wreathe the trees.

So it was that he came upon her, as once before. But this time she was alone, her arm up against a great treetrunk, her face hidden in the arm. He came a little nearer. She was manifectly crying. Betty crying! He could not help letting everything but his old love for her melt away like the winter's snow.

He was behind her in an instant, taking her by the shoulders, turning her around to face him. She resisted at first, but did not try to conceal the tears in her eyes.

A single way to tell whether your room is properly ventilated is to place a wide-necked bottle of water into which you have put half an ounce of lime water, in the room, letting it remain uncovered over night. If in the morning the lime water is milk the ventilation is bad. If the lime water becomes milk on your covering the bottle mouth with your hand and shaking the vessel, the ventilation is not sufficiently good. If the lime water remains clear, the air of that room is pure.

Under all these honors, as far as we are in-formed, the American public bore itself with some degree of composure, but the arrival of the duke on a purely social visit was too much for the pent-up aristocratic emotions of all sections of the population, and they received him with as great a show of fealty as though he were the reigning prince and they his sworn subjects."

FIRST OF THE WHITE RACES

We gather from the "Russian Year Book" that on January 1, 1910, the population of Russia amounted to 160,748,400, and together with the Finnish provinces the total population amounted to 163,778,800 people. In 13% years, from the autumn of 1897 to January, 1911, in spite of war, cholers and famine the Russian population has increased by 33,199,000 souls—an annual growth of 2,732,000. In point of numbers Russia is first of all the white races.

EXPERT ON FALLING SAFELY Motorcycle Racer Explains Why He Isn't Killed When He Tumbles on Saucer Track.

on Saucer Track.

"People who know nothing about it think that failing from a motorcycle going at high sped is sure death," remarked. Joe Walters, the famous racer, who was recently spilled from his machine while it was moving at the rate of 90 miles an hour, and escaped with a few acratches. "As a matter of fact it is safer to fall from a machine moving at 100 miles an hour than it is to fall from one going at half that rate of speed. If the speed la great enough to throw the rider free of his machine he sildes along the track and escapes with a few keratches, or, possibly, some broken bones. The development of the motorcycle saucer track greatly lessens the danger. If the rider is at the bottom of the track he runs small danger of being injured, provided he has presence of mind to keep from under the motor in case of an upset. The few riders that have been killed were alther caught under the machines or were riding near the top of the track and brought up against one of the posts. In my fall at Los Angeles the were riding near the top of the track and brought up against one of the posts. In my fall at Los Angeles the law of grayitation brought into play by the third of a mile circumference of the track kept my weight and the weight of the machine off the boards until the momentum had stackened and there was practically no danger. The marks I made on the track will bear out my statement. There is a scratch about fifty feet in length almost immediately in front of the paddock, 200 feet from where I started to fall. The mark shows the comparatively short distance the machine and I silpped before coming to a standstill. The only damage I sustained was a bent pedal and some minor scratches.

At a point on the railway line between Mirabel and Canaveral, on the Banish side of the boundary line between Spain and Portugal, there once occurred an odd sort of buillight.

A train had just come out on a sweeping curve from the hills and down upon a little plain when the engineer saw directly before him a herd of bulls on the tracks. The engineer blew his whistle vigorously and still the bulls fied, with the exception of one great fellow, who made straight for the train with horne jowered and roaring defiance.

It was too late to prevent a collision and the bull was killed, but his carcass, lying under the wheels of the locomotive, prevented the train proceeding. Passengers and crew united to clear the track. In the meantime the great herd of bulls, scenting the blood of their dead leader, came flocking back, pawing and threatening. The nearer they came the more infuriated they grew, and flushy they charged like a whiriwind on the little band of workers.

One of the eleverest swindlers I over landward was tracked through his postage. "Those aren't finger exercises."

"After you put a stamp on a certain way for a little while it becomes second nature and you stick it on that way unsconsciously. That was what that man did. All his stamps were stuck on diagonally, leaving a little triangle of a certain size at the corner of the envelope. He was a slippery fellow and had eluded vigilance for months. One day I happened to be loitering around a postoffice of a country town where I had gone on another trail. The mail came in, and through the little window I watched the postmaster sort it. Presently I spotted an envelope with the stamp stuck on in that triangular fashion. I got the postmark, hiked back to that town, and nabbed my man. If he had put his stamps on straight, probably he never would have been caught."

It was not much work to carry the shield, but the quick action required by the hand and arm which did the fighting soon developed that arm. Henry, anxious to prove that the Englishman was the better man, promised to find the forfeits himself and drank his beer at a draft, while it took the German four gulps to account for the wine. same authority that Jesus gave to the twelve Apostles. Upon this claim they ordained the inferior clergy.

This principle is wholly unscripturals According to the Bible, the Church of, Christ is not composed of two parts, clergy and latty. Jesus declared. "All ye are brethren; One is your Master, Christ." St. Paul shows that in the early Church the ministers were the servants of the fock. They were of the people, chosen by them by the stretching forth of the hand.

Many of the reformers coveted the How early did mankind think of the convenience of the fingerless glove? Little was said of gloves in ancient

Little was said of gloves in ancient times, but in most cases it is obvious that they had fingers. Those worn by the secretary of the younger Pliny, used when he visited Vesuvius, so that he might keep on jotting down notes in spite of the cold, must have been fingered, no less than those of the glutton in Anthenaeus, who wore gloves at table so that he might handle the meat while hot and get in advance of his bare handed fellow diners. Many of the reformers coveted the titles accorded the Catholic clergy They did not care to tell the congre gation that its word was supreme, and that its ministers were merely its servants. Others, realising that the tles were unscriptural, declined hem; preferring to be called pastor. My Bible Student associates, knowing my objection to the title "Reverend," address me as Pastor. I am the elected Pastor of the Brooklyn Tabernacle congregation, and also of the London Tabernacle congregation, and I fail to see ground for criticism in this respect, nor do I attack Christian brethren who eccept other and unscriptural titles.

> Must Pastore Be Ordained? Ordination is necessary to the office of pastor. The question is, What consti-tutes an ordination to preach amongst

tutes an ordination to preach amongst the people of God? This question has received various answers. The Roman, Anglican and Greek Churches, claiming Apostolic Buccession, declare that authorization a furnace, and then you turn the red-hot stream into a hole in the sand, and everybody yells and shouts. "Then you pour it out, let it cool and pound it, and then you put in it a thing that bores holes in it. Then you screw it together, and paint it, and put steam in it, and it goes splen, didly, and they take it to a draftingroom and make a blue-print of it.
"But one thing I fornet—They have succession, declare that attributation to preach must come through their apostle-bishops, and have not allowed Protestant ministers to enter their pulpits-until the Epis course, if their proposition were corside and one gets outside, and they pound frightfully, and then they tie it to the other thing, and you ought to see it go!"—Youth's Companion.

more so.

Each denomination at its beginning was opposed by all others; yet each taught that the clergy were separate from the laity. Only since the organization of the Evangelical Alliance (1846) have the different sects of Christendom acknowledged each other's ordinations. Each denomination makes use of such ceremonies as it deems proper. If, therefore, the congregation of Christian believers in Brooklyn and London ordain or appoint me as their pastor, it is their own choice what ceremonies, if any, shall accompany that ordination. Who can dispute this? No Protestant denomination, surely; for their own ordinations are on this very basis.

The subject of ordination seems to have fallen into confusion during the Dark Arges. St. Paul particularly emilyphasizes the fact that he did not resistent the commission as preacher and Aposties, but by Divine authorizationa. This is the Scriptural principle underly, ing Divine Ordination to the ministry of Christ.

The Task at Hand.

The late Clars Barton, head of the American Red Cross, was a Christian in perhaps the best sense—the practical and unselfish sense.

Miss Barton, in an interview in New York about the tenement house laws, once said to a reporter:

"I'd neglect church, I'd neglect religion to get our vite and unwholesome slums all swept away."

She paused, then added:

"We ought not to consider the mansions awaiting us on the other side of Jordan, you know, while there's an unsolved housing problem so near home."—Washington Star.

"O, John, I've so much to tell you."

In a daintily furnished room of a litthe flat in Queen's Club Gardens, a woman lay dead upon the bed with an empty phial in her hand. There were traces of tears upon her white, cold traces of tears upon her white, cold cheeks; her closed eyelids were swoll-en. Her lover had failed her. There nothing before her but the streets, 36 she, too, had "played the game." God will decide who played it best.

Plan to Make Rome Seaport.

The latest project to make Rome a seaport is to lay out a port 35 feet deep near Castel Fusaro, formed by running two jettles out into the seafor some distance, as at the port of Ymulden, Holland. From the port will lead a ship canal 15 miles long and 260 feet wide and 27 feet deep. At Rome shipping accommodations will be laid out in the river below the city, and this will be connected with the navigable part of the Tiber by a system of locks. It will cost about \$15.00,000 to carry out the project. Opponents of the idea claim it will not pay, but the promoters affirm that pay, but the promoters affirm that when once the city is connected with the Mediterranean there will result a great amount of traffic.

The Prince of story tellers knows the remedy. No audience is ever too old to be caught with proper balt. The essential thing were that the new auxiliary power mawith proper balt. The essential thing in a story is to make something in a story is to make something happen. Christ's parables had action. Of course they were only stories, but often a story is truer than a statement of facts! Indeed, prosale literatness may be a deadly enemy to truth. "The kingdom of heaven is likened to ten virgins." Hello-a wedding story! Love, romance, orange blossoms. Love, romance, orange blossoms. Every one's eyes glisten. The world is ready for such stories. Christ knew story value in teaching. nished all the fuel required. In these cases there was some excusar for keep-ling inefficient machinery in use.

More recently, however, conditions have taken a decided change. The price of coal has advanced, making it urgent to be more careful in the use of it. Steel companies have found that it pays better to sell the coal than to burn so much of it themselves. Then, again, the supply of matural gas in some localities has become limited or has given out entirely—nuother reason for saving fuel. All the world loves a lover. So does God. God smiles on the ground where true love walks. Love is a long June day, and every one's anxious to cast roses in love's pathway. No trouble getting ten virgins to go out and meet

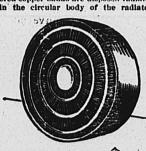

In later years competition has be-come keener. Large plants have been built, and the older concerns have had to conserve their resources in order to meet this competition. —II Corinthians

The Pastor said that in order to appreciate the (PASTOR RUSSELL) subjects, we must handle the Word of every girl here exactly what you think of her," explained Edith. "You must tell her good qualities and her bad qualities. But it must be the plain, unvarnished truth, irrespective of anybody's feelings."

"Oh, I couldn't do that in a million years," gasped Amy, "I think you are all perfect dears."

"Dhi same sense that He desires all of His disciples to be one—in mind, in

all perfect dears."

"But everybody plays "Truth," declared Marjory. "It's fascinating. Besides, it's good for any girl to learn her faults. Some great philosopher said, 'Know thyself.' I forget who he was, but he said it, anyway. And none of us will get angry, no matter what is said, will we, girls?"

"No, indeed," returned an emphatic chorus. "We are too broadminded for that."

"Come, Helen, you begin the game," suggested Marjory.

"Is disciples to be one—in mind, in purpose, in will, in effort. (John xvii, 21, 23.) Our Lord Jesus is God's unspeakable Gift.

The Scriptures declare that the Redemer took the nature of men in order to redeem sinners; but that in Him there was no sin. Only a sinless one could give to God a Ransom for Adam, and thus redeem from destruction, not only Adam, but all his posterity, involved in sin and death through him.

The speaker then showed that God set before our Lord a great joy, the

The speaker then showed that God set before our Lord a great joy, the influence of which led Jesus cheerfully the bitter experiences of His earthly life. This joy is intimated to sition, and you are lots of fun, but you have no idea of style or dress. It's a pity. Amy said only yesterday, 'How can that girl wear that impossible white pole coat when she is so fat and dumpy?'"

Church; (3) His pleasure and joy in being by and by the world's Restorer, delivering them from the power of Satan, livering them from the power of Satan, sin and death. "Wherefore," St. Paul sin and death. "Wherefore," St. Paul snys, "God hath highly exalted Him," for above "angels, principalities and powers, and every name that is named."

An Opposite Course From Satan's. course pursued by Satan with that fol-lowed by our Lord. Meditating ambitious designs, Satan found an oppor-tunity in Eden. He beheld in our first parents a new order of beings, designed to bring into existence a race that would fill the earth. Satan essayed to be ruler or prince over this human cre-ation; and by so doing, he not only became a rebel against God, but brought

sin and death into the world. Our Lord Jesus pursued an opposite course, and demonstrated His loyalty and obedience. St. Paul intimates that although the Logos was much higher than was Lucifer, yet He was humble, and "meditated not a usurpation," as the Greek text declares. (Phil. ii, 6.) He thought not by robbery to be equal with God. On the contrary, our Lord willingly accepted the Divine pro-posal that He should be humbled to the human plane for a time, in order to

carry out the Father's Plan. To the Church, Jesus is God's un-speakable Gift. He is indeed a Gift to the whole world, unspeakable than to the world. To His footstep followers, He is the "Captain of their Salvation," their Bridegroom, their "Elder Brother," their great High Priest. Through Him they are priv lleged to be the Royal Priesthood. Through the merit of the sacrifice of Christ, they are privileged to "present their bodies living sacrifices, holy, ac-ceptable unto God."

The Pastor then said that Justice is the foundation of God's Throne. In

the past, endeavors to harmonize Justice with our great Creator's dealings with humanity have involved us in difficulty. We were assured by the prominent creeds that God had knowingly brought mrakind into existence under such conditions that the great majority would spend eternity in torture. We perceived no Justice in any such arrangement. But while design. such arrangement. But while desist-ing from criticising the Creator, we could not indorse such a course, nor see it to be in harmony with the Divine regulations governing ourselves. If we are to love our enemies, should more be expected of fallen human be-lugs than of our perfect Creator?

The Scriptures declare only the con-secrated Church see the "lengths, breadths, helghts and depths of the Love of God," which passeth under-standing. This class alone is in any sense prepared to give thanks to God now for His unspeakable Gift. Their thanks go up, not only in words, but also in actions, which "speak louder than words." These thanks ascend as

weet incense to God.

By and by, "All the blind eyes will be opened and all the deaf ears will be instopped." Then the whole world of unstopped." Then the whole world of mankind, Including those awakened from the sleep of death during Messiah's reign, will be in condition to recognize God's unspeakuble Gift and render thanks. When wilful evil doers shall have been destroyed, then every creature in Heaven, on earth and in the sea shall be heard saying, "Praise, glory hours domination and might be glory, honor, dominion and might be unto Him that sitteth on the Throne, and to the Lamb, forever," through the unspeakable Gift.

The others taking part in the play were Mrs. H B Hall, gorgeously gowned nithough the style was rather anti-quated; Mrs. Eugene J. FINE TAILORING MEN AND WOMEN 506 Main St., Riverton

Making Campaign Banners, The services of twelve men are re-ulred to produce one of the big campaign banners. Two men prepare the strips on which the lettering is done. Two more look after the lettering of these strips, the painting of the names of clubs or associations ordering the banners, the captions for the portraits and the offices for which the nominees are to contend. Two men work on the centerpieces, generally consisting of an agle and shield. One man dev off to the special portraits, and sew the strips together and give the finishing touches to the banner. The "portrait man" scorns to do any other work than the main portrait. The rest he calls "filling in." By working on the same faces day after day this artist becomes so skillful and so rapid in execution that he can paint the por-trait of a candidate in the dark, and paint it as true to life as the standard of the campaign banner industry re-

An Extensive Shave An Extensive Shave.

When Salmon P. Chase was a schoolboy at Worthington, O., he was one day
left at home with orders to kill and
dress a pig while Bishop Chase and
most of the older members of the family were gone. In telling of this experience he wrote in an old letter:

"I had no frouble in catching and

slaughtering a fat young porker. I had the tub of water all ready for plunging him in, preparatory to taking off his bristles. Unfortunately, however, the water was too hot, or perhaps when I soused the pig I kept him in too long. At any rate, when I undertook to remove the bristles I couldn't start one of them. They were set! But that pig had to be dressed. I bethought me of my cousin's razor—a new one, just purchased by that spruce young clergy-man. No sooner said than done! I got the razor and shaved the pig from tall

o snout."

asparagus plumosus. The winter blooming oxalis is a great favorite because of its profuse flowering liabit. The yellow or buttercup oxalis must not be overcrowded. Not more than three bulbs should be plant-ed in a five inch pot, as they grow very fast and soon become too crowded, sending up more leaves crowded, sending up more leaves

Following the report of the commit-tee appointed by the Vancouver city council to investigate the smoke and sawdust nuisance caused by burning refuse from the various sawmills of the city, which it was claimed allowe the city, which it was claimed allowed much fine sawdust and soot to escape in the air, au application has been made to the city by a company composed of about ten prominent mill owners for a franchise to sell steam heat and electric light and power. The company's intention is to utilize the sawdust and refuse for fuel by installing plants at the mills the by installing plants at the mills, the idea being to use the different plants as substations instead of establishing

as substations instead of establishing a central power plant, thus avoiding the hauling expense. This will not only minimize the risk of accident to only minimize the risk of accident to the plant, interfering with the regular supply, but will also, in furnishing steam heat, enable the company to supply it over a wide area with much lower pressure than if furnished from a central plant. It is intended to also establish at each mill an auxiliary oil burning apparatus to be used should the refuse pile run low.

It is thought that heat, light and power can be furnished by this average.

power can be furnished by this system at a far lower rate than is charged by the present power company operating in the city. In making the application an option to purchase is given to the city should it desire to take the entire supply of the plant within a reason-able time.

in addition to its loss, has bothered the lumbermen for years, and it is hoped that this scheme will prove feasible and profitable.

In furnishing steam heat it is proposed to use the exhaust steam. It is thought that it can be supplied at about 60 cents per 1,000 feet, the measurement being the flow of water from the condensed steam running into the simplex meter, consisting of a set of two cups, one filling and in dropping raising the other and thus automatically registering the flow.

The engineer of this proposed company estimates the amount of sawdust and refuse burned annually by these mills as equivalent to 114,000 these mills as equivalent to 114,000 cords. The approximate cost of install-

Down Brakes!

Just as Kathleen flung her head in
baffled vexation, and Mallory started
to slink back to Marjorie, with another defeat, there came an abrupt shock as if that gigantic child to whom our railroad trains are toys, had reached down and laid violent hold on the Trans-American in full

Its smooth, swift flight became suddenly such a spasm of jars, shivers and thuds that Mallory cried: "We're off the track."

He was sent flopping down the aisle like a bolster hurled through the car. He brought up with a sickening slam

The passengers began to regain their courage with their equilibrium. Little Jimmie Wellington had flown the whole length of the car, clinging to his wife as if she were Francesca da Rimini, and he Paolo, flitting through Inferno. The flight ended at the stateroom door with such a thump that Mrs. Fosdick was sure a detective had come for her at last, and

The car was ringing with hilarity, when the porter came stumbling in and paused at the door, with eyes all white, hand waving frantically, and lips flapping like flannel, in a vain effort to speak. The passengers stopped laughing at Marjorie, to laugh at the porter. Ash-

on the back and repeating:

"Nover volvers!" The reports were mingled with barbaric yells that turned the marrow in every bone to snow.

These regions are full of historic torror. All along the Nevada route the conductor, the brakemen and old travelers had pointed out scene after scene where the Indians had slaked the thirst of the arid land with white man's blood. Ashton, who had traveled this way many times, had made himself fascinatingly horrifying the evening, before and ruined several breakfasts that morning in the dining of pulpers of policies of pioneer ordeals, men and women massacred in burning wages, or dragged away to flendish cruelty and obscene torture, staked out supine on burning wastes with eyelied cut off, bound down within reach of ratitiesnakes, subjected to every misery that human devittry could devise.

The violent stopping of the train, the beart-shaking yells and shots outside, found the passengers already apt to respond without delay to the ap-peals of fright. After the first hush of dread, came the reaction to panic. Each passenger showed his own panic in his own way. Ashton whirt

round and round, like a horse with the blind staggers, then bolted down the aisle, knocking aside men and women. He climbed on a seat, pulled down an upper berth, and, scramblin into it, tried to shut it on himself. Mrs. Whitcomb was so frightened that she assailed Ashton with fury and seizing his feet, dragged him back in-to the aisle, and beat him with her flists, demanding that he protect her and save her for Sammy's sake. Mrs. Fosdick, rushing out of her

stateroom and not finding her lus clous-eyed husband, laid hold of Jim mle Wellington and ordered him to go to the rescue of her spouse. Mrs. Wellington tore her hands loose, cry-ing: "Let him go, radam. He has a wife of his own to defend."

Jimmie was trying to pour out dy-ing messages, and only sputtering, for-getting that he had put his watch in getting that he had put his waten in his mouth to hide it, though its chain was still attached to his waistcoat. Anne Gattle, who had read much about Chinese atrocities to miss

This reheartened Mallory withed, but all he said was: "A soldier desn't have to be a jackass. I know just enough about to make with the wrong dun of 'em."

Marjorle was trying at the same time to compel Mallory to crawl under a seat and to find a place to hide Snoozleums, whom she was warning not to say a word. Snoozleums, un-

Suddenly Marjorle restized that Kathleen was trying to faint in Maiacross the seat into which Marjorie. had been jounced back with a breath-taking slam. The marauders were apparently cattlemen, from their general get-up. Their hats were pulled low, and just beneath their eyes they had drawn big black slik handkerchiefs, tied behind the ears and hanging to the breast.

"But I'm not a passenger," Mr. Baumann urged, with a confidential smile, "I've been going through the train myself."

"Much obliged! Hand over!" And a rude hand rummaged his pockets. It was a heart-rending sight.
"Ol oi!" he wailed, "don't you allow no courtesies to the profession?" And

Over their shoulders they had slung the feed-bags of their horses, to serve as receptacles for their swag. Their shirts were chalky with alkall dust. Their legs were encased in heavy chaparejos, and they carried each a ruptor for shill seed feel and the statement of the stateme chaparejos, and they carried each a pair of well-used Coit's revolvers that looked as big as artillery.

When the passengers had shoved and jostled into line, one of the men jabbed the conductor in the back with the muzzle of his gun, and snaried:
"Now speak your little piece, like I learned it to you."

The conductor, like an awkward schoolboy, grinned sheepishly, and

And so they worked from each end of the car toward the middle. Their hands ran swiftly over bodies with a loathsome familiarity that could only be resented, not revesged. Their hands dived into pockets, and up sleeves, and into women's hair, every where that a lowed or a hill might be as she murmured:

hands dived into pockets, and up sleeves, and into women's hair, every where that a jewel or a bill might be secreted. And always a rough growi or a swing of the revolver silenced any protest.

Their heinous fingers had hardly begun to ply, when the solemn stillness was broken by a chuckle and low hoot of laughter, a darkey's unctuous laughter. At such a place it was more shocking than at a funeral.

"What alls you?" was the nearest robber's demand.

Get Habit of Quiet Speaking.
The easiest of bad habits to acquire is that of speaking loudly. Language has become so complex that not only is it necessary to say the right thing, but it must be said in the right way. A phrase may be said in jest or in earnest; a rebuke may be kindly or stern; an order may be willingly or earnest; a rebuke may be kindly or stern; an order may be willingly or unwillingly received according to the tone in which it has been said. Many a faithful workman is unjustly ac-cused of unwillingness and disloyalty because of the churlish manner in which orders are received; many a master is regarded as unfeeling by "Then, passengers," the porter pro-claimed, while the robber watched him in amazement; "then, passengers,

German Cures.

In Germany one finds all kinds of cures. Every enterprising town has one. Often the cure house is the finest public building in the city. A German talks of going to his cure as an American of going to his vacation. There are milk cures and mud cures, wind cures and water cures; but my choice is the forest cure.

Not only does it best please my personal taste but I notice that it gets the most serious cases—those where radical and heroic cures are needed. First of all there are the tuberculosis patients strewn about on their cots wind course. Annoying Honesty.

Having vouched for the honesty of the woman who wished a situation as scrubwoman, the good-natured man was subjected to a severe examination by the superintendent of the building.

"There are degrees of honesty," said the superintendent. "How honest is she?"

The good-natured man reflected.
